PLEASE READ BEFORE ORDERING

Delivery of Seeds

All **Vegetable and Flower Seeds** in this price list except **Peas, Beans and Sweet Corn** will be sent to places in the United States transportation charges prepaid. We will ship by parcel post, express or freight **at our option**. If seeds are ordered shipped by express where we would ship by freight, they will be sent by **express collect**.

Peas, Beans and Sweet Corn will be shipped at purchaser's expense, except as follows: If these seeds are included in any one order amounting to \$20.00 or more (not including Farm Seeds, Accessories, etc.) we will prepay transportation charges.

We will **not** pay transportation charges on **Field and Grass Seed, Potatoes, Onion Sets, Accessories, Etc.** These articles are always sent at **purchaser's expense**, except where they are quoted "Transportation paid" in this price list.

Orders may be sent at any time and goods will be shipped at the time specified on the order.

When ordering seeds shipped by freight or express please be sure to give the name of your nearest freight railroad station or express office if it is different from your post office address.

Freight shipments are now frequently delayed, so please send in your order well ahead of the time you wish to use the seeds.

Terms and Discounts

Our regular terms are **cash with order**. When cash is sent with order we allow a **discount of 5%** on vegetable and flower seeds and plants, small fruits and accessories. (*Note: This discount does not apply to Semesan Products and "Black Leaf 40" which are net under the Fair Trade Law.*)

Field and Grass Seeds are strictly net cash with order at prices quoted.

To **Market Gardeners** of established credit and those who furnish us with satisfactory references we allow the following **time payments except on field and grass seeds, which are strictly cash with order.**

Bills for seeds, plants, etc., shipped after December 1st are due and payable **net** August 1st.

Bills for goods shipped after August 1 are due **net** December 1st.

To **Florists** of established credit and those who furnish us with satisfactory references we allow the following **time payments except on field and grass seed.**

Bills for seeds, plants, etc. shipped after December 1st are due and payable **net** June 1st.

Bills for goods shipped after June 1st, are due **net** December 1st.

25% of the value of the order must be sent with all orders for goods to be shipped C.O.D.

Plants will not be sent C. O. D.

Conditions of Sale

No seeds are sold by us that we do not know are of good vitality and will grow under normal conditions. They are all tested and the per cent that germinates is marked on the package or label.

We assume responsibility of the seeds, plants and bulbs reaching the purchaser in good condition. However, in common with all responsible seedsmen, we give no warranty, express or implied as to the productiveness of any seeds, plants or bulbs we sell, and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed. We will not accept or fill orders under any other conditions.

Moreton Farm, Rochester, N. Y., Dec. 1, 1942

JOSEPH HARRIS COMPANY, INC.

Our General Catalogue

Our general catalogue (containing more complete descriptions of the varieties listed here) is issued in January. Your copy will be mailed to you as soon as issued. If you do not receive it, let us know. We will gladly send copies to your friends on request.

JOSEPH HARRIS CO., Inc.

Remittance may be sent by Check, Draft, P. O. Order, Express Money Order or Registered Letter. Amounts under \$1.00 may be sent in Postage Stamps. It is not safe to send silver.

HARRIS SEEDS

1943 Market Gardeners and Florists Price List

FIELD OF HARRIS' DETROIT DARK RED BEET SEED

This is the fine crop we grew last summer. For over 30 years we have grown and selected this magnificent strain of beets here on Moreton Farm. *See page 5.*

Seeds to Grow the Nation's Food

Wartime conditions have created a tremendous demand for vegetable seeds, and we are proud to serve the nation by helping to supply these needs. For many years it has been our policy, and now it is our duty to provide our customers with the best seeds that can be bought.

On our own farms we have had such fine weather this fall that our seed crops of beans, corn, tomatoes, cucumbers, squash, peppers and melons have given us beautiful seed of high germination. Earlier this summer we harvested our beet and parsnip crops and never had better seeds. We are especially pleased to have these results, as we are told that many seed crops in the West have been short and of inferior quality.

The government requirements of vegetable seeds under the Lend Lease Bill are

enormous, especially of carrots, beets, onions and parsnips. It is generally concluded that there will be no surplus of any seeds this year.

As soon as you are able to plan your crops we advise you to send in your order so you may be sure to get the seeds you want and have them on hand when you are ready to sow them. Nothing is so provoking as to have your land ready and then have to wait for your seeds.

We expect to fill our orders with our usual promptness, but the railroads are overcrowded and freight shipments are often delayed, so to avoid the expense of having them sent by express, please allow plenty of time between the date of your order and the time you wish to sow the seeds. We urge you to order as early as possible.

EVERY LOT OF SEED IS TESTED!

The germination is plainly marked on every package of seed we sell. Use this guide when sowing to get good stands.

PLEASE NOTE: *All prices here quoted are subject to change without notice and to our stocks being unsold.* For prices of seed in quantities less than listed here, please refer to our general catalogue.

ASPARAGUS

Mary Washington—Large, early and "rust resistant"

The best of the "rust resistant" varieties. Originated by the United States Department of Agriculture at Washington. Our seed is the true strain and will produce the finest large stalks. Oz. 15c; $\frac{1}{4}$ lb. 40c; 1 lb. \$1.25; 10 lbs. \$11.50. *For roots see page 35.*

ARTICHOKE

LARGE GREEN GLOBE. The Standard Variety. Produces the flower buds which are used for food the second year after sowing the seed. The plants are not hardy and require protection in winter north of Virginia. Oz. 50c; $\frac{1}{4}$ lb. \$1.50; 1 lb. \$5.00.

BEANS

One pound of beans will plant 150 ft. of row. 60 to 75 lbs. per acre.

*At the prices here quoted, beans are not prepaid. Purchaser pays transportation on beans except as follows: If your order for vegetable seed including beans amounts to \$20.00 or more we prepay freight charges. (See also inside front cover.)

Our beans are grown from clean, true, high yielding stocks which are carefully rogued in the fields and hand picked. Our first consideration is to supply our customers with the best beans obtainable. We have made our prices as low as possible for our high quality stock.

Sure Crop Wax—The Best Flat Wax Bean

If you want a flat wax (yellow) bean, grow our strain of Sure Crop. It is fully equal to any and much superior to most stocks offered. It is vigorous, healthy and of upright growth, producing enormous yields of long straight pods. One of the most popular and profitable wax beans to grow. See prices below.

Pencil Pod Black Wax—The Best Round Podded Wax Bean

This is the bean to grow if your trade wants a round pod wax variety. This is a carefully bred stock, which has been especially selected for vigor, high yield and true type. Growers in all sections have been greatly pleased with this stock. See prices below.

DWARF WAX VARIETIES

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

NOT PREPAID* (See above)

	1 lb.	7 $\frac{1}{2}$ lb.	15 lb.	100 lb.	500 lb.
PENCIL POD BLACK WAX. See above.....	\$.35	\$1.95	\$3.60	\$21.00	\$100.00
ROUND POD KIDNEY WAX or Brittle Wax.....	.35	2.00	3.75	22.00
Pods 5 to 6 in. long, straight, round, clear yellow, stringless and medium early.					
SURE CROP WAX. The Best Flat Wax Bean. See above...	.35	1.95	3.60	21.00	100.00
UNRIVALLED WAX. For Early Market.....	.35	1.90	3.45	20.00	95.00
A heavy yielder of attractive narrow, flat, clear yellow pods of refined appearance. A few days earlier than Sure Crop.					
WEBBER WAX or "Wonder Wax." The Earliest Wax...	.35	1.90	3.45	20.00	95.00
Long, straight, flat stringless pods. Quite free from rust and a heavy bearer. Also called "Cracker Jack."					

French Horticultural

Harris' Special Stock

You can't go wrong on Harris' Special Stock of French Horticultural Beans.

Our customers have amply demonstrated the plain fact that no finer stock of this variety can be obtained.

This is a pure line strain which we have increased from a single plant that we selected in 1928 and is outstanding for its uniform long pods, superb coloring and high yield.

Particular growers find it superior to any stock sold, and fully equal to the finest of the jealously guarded "private stocks." See prices on next page.

"I had such wonderful results with your seeds last year that I am completely sold on Harris' seeds."

A. W. Greenley, Bethlehem, Penn. Feb. 12, 1942.

French Horticultural Beans

Typical plants in one of our seed fields.

Streamliner (New)—Long Straight Pods—Heavy Yield

This fine new flat-podded bean has already made a great hit for market and shipping. The straight pods are slender, bright green and exceptionally long, measuring seven or more inches in length. The vines are vigorous and bear great clusters of beans, making the yields enormous.

Streamliner is in great demand by growers, especially those who sell on markets where fine appearance is of most importance. The beans are stringless and white seeded. See prices below.

Plentiful (New)

This new variety is now well established and is extremely popular among growers of flat-podded beans. In some large markets, because of the attractive appearance and fine quality it has brought a premium over other varieties. The pods resemble Bountiful but are longer and a few days later. They are bright green and very good looking; stringless and of the finest quality. Black Seeded.

The vines are upright, robust and produce large crops. It is one of the heaviest yielders. We urge you to grow Plentiful this year. See prices below.

**Plentiful Beans**

These attractive pods are of the finest quality.

Tendergreen—The Best Round Pod Green Bean

If you want an early round podded green bean, you will do well to grow Harris' Tendergreen. It is the best bean of this class, and is one of the largest selling kinds.

The pods are round, handsome and straight; entirely stringless and with tender rich meat. They are produced in great abundance on sturdy upright vines. See prices below.

DWARF GREEN-PODDED BEANS

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

NOT PREPAID* (See page 2)

	1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
BOUNTIFUL. Selected Stock.	\$.30	\$1.80	\$3.30	\$19.00	\$90.00
The handsome early pods are long, straight, light green and entirely stringless. There is no better stock of this well known variety.					
Black Valentine.30	1.65	3.00	17.00	80.00
A profitable market bean, produces large crops of long, round, straight, light green pods. Not stringless except when very young.					
Giant Stringless Green Pod.30	1.75	3.15	18.00	85.00
Slightly curved, round pods, stringless of excellent quality.					
PLENTIFUL. (New) See above.35	1.95	3.60	21.00	100.00
STREAMLINER. (New) See above.35	2.00	3.75	22.00	105.00
STRINGLESS BLACK VALENTINE.30	1.80	3.30	19.00	90.00
One of the most prolific and earliest green beans. The pods are long, straight, nearly round when young and very attractive. One of the best market beans and a very profitable variety to grow.					
TENDERGREEN. Early Prolific. Round Pod. See above.35	1.95	3.60	21.00	100.00

Horticultural Beans

FRENCH HORTICULTURAL. Special Stock. See photo and description on preceding page40	2.10	3.90	23.00	110.00
Lowe's Champion.35	1.90	3.45	20.00	...
One of the Horticultural or Cranberry beans. Pods 4 in. long, flat, green, straight and entirely stringless.					
Ruby Dwarf Horticultural. Also called "Roman" Beans.30	1.80	3.30	19.00	90.00
Used for shelling green. Pods light green splashed with deep red.					

LIMA BEANS**Fordhook Bush Lima—The Most Profitable Dwarf Lima**

Our stock of this fine bean has earned an outstanding reputation for high yield and quality among successful growers. The pods are uniformly large with choice thick green beans. See prices below.

NOT PREPAID* (See page 2)

	1 lb.	7½ lb.	15 lb.	100 lb.	500 lb.
Burpee's IMPROVED Bush Lima.	\$.40	\$2.20	\$4.05	\$24.00
Larger pods, thicker, deeper green beans than the old variety.					
FORDHOOK BUSH LIMA. Best for Market. See above.40	2.25	4.20	25.00	120.00
Henderson's Bush Lima.40	2.10	3.90	23.00	110.00
Small flat pods and beans, early and very prolific.					
IDEAL or Mammoth Podded POLE LIMA.40	2.20	4.05	24.00
Pods often 8 in. long, early and prolific. This is the best large podded Pole Lima.					

POLE BEANS

A pound of Pole Bean seed will plant 120 ft. of row or about 100 hills.

King Horticultural—Harris' Special Large Seeded Strain

This variety is superior to French Horticultural both for yield and disease resistance. The pods are only about an inch shorter and slightly wider than French Horticultural. They are very attractive, being heavily splashed with bright scarlet at the shell stage, straight and entirely stringless. When put on good, well drained land, they can be grown without any support. When grown this way the pods are just as long and straight and they can be picked as easily as the dwarf kinds. This large seeded strain is of our own growing. See prices below.

25 lbs. or more of one variety of beans will be supplied at 100 lb. price. A bushel weighs 60 lbs.

	NOT PREPAID* (See page 2)			
	1 lb.	7½ lb.	15 lb.	100 lb.
Kentucky Wonder. Also called "Old Homestead".....	\$.35	\$1.90	\$3.45	\$20.00
Long, slender, green pods of fine quality. Early and very prolific.				
KENTUCKY WONDER, WHITE SEEDED. Heavy Yielding.....	.35	2.00	3.75	22.00
This is the most uniform and prolific strain of Kentucky Wonder. Long slender pods. Has the added advantage of being white seeded.				
Kentucky Wonder Wax.....	.35	1.90	3.45	20.00
Long, flat, yellow pods of fine quality. One of the best wax pole beans.				
KING HORTICULTURAL. Special Large Seeded Strain. See above	.35	2.00	3.75	22.00
SCOTIA. Fine for Roadside Markets.....	.35	1.95	3.60	21.00
Extremely prolific, with round slender green pods of the finest quality. Has proved very profitable as a high quality bean for discriminating trade.				

FIELD BEANS

Sow about 60 lbs. per acre.

	NOT PREPAID* (See page 2)			
	1 lb.	7½ lb.	15 lb.	100 lb.
BOSTON MARROW or White Marrowfat. Perry Strain	\$.30	\$1.65	\$3.00	\$17.00
CALIFORNIA RED KIDNEY30	1.75	3.15	18.00
Robust Pea Beans. N. Y. State Certified.....	.25	1.30	2.25	12.00
White Kidney35	1.95	3.60	21.00

Italian Green Sprouting Broccoli

BROCCOLI

True Italian Green Sprouting (Calabrese Strain)

1 oz. of seed will produce about 2000 plants.

This is the best stock which can be obtained and is the true "Calabrese" strain. You can depend on this stock to produce compact center heads and an abundance of large side shoots.

Note: Where small center heads are wanted for bunching, it has been found practical to sow the seed in 2½ foot rows and thin the plants to 3 to 6 inches. This will produce an abundance of small heads and side shoots.

Oz. 60c; ¼ lb. \$1.75; 1 lb. \$6.00.

BRUSSELS SPROUTS

1 oz. of seed will produce about 3000 plants.

There is always a good market for first class sprouts, and they are surprisingly easy to grow. The thing to do is to grow the right kind. We offer the best obtainable.

Catskill

Heavy Producer—Firm Sprouts

We obtained our foundation plants of this stock several years ago from Mr. Arthur White of Arkville, N. Y. Mr. White's stock has long been considered the best by expert growers in this Catskill mountain region where the finest Brussels Sprouts in the country are produced.

This seed was grown on our own farms from plants which were carefully selected to maintain the original true high producing type.

¼ oz. 90c; ½ oz. \$1.65; 1 oz. \$3.00; ¼ lb. \$10.00; 1 lb. \$35.00.

Catskill Brussels Sprouts

BEETS

$\frac{1}{4}$ lb. of seed will sow about 250 ft. of row. Sow 10 lbs. of seed to the acre for rows 14 in. apart; 6 to 8 lbs. per acre for rows 18 in. apart.

Harris' Special Crosby's Egyptian

Finest Beet For Early Bunching

Harris' Crosby is without question the besy early bunching beet obtainable. It is very early, makes a good top and handsome dark red beets with small tap roots. Their smoothness and uniform shape makes them invariably the finest looking beets in the market, and they naturally command top prices.

We are proud of our stock of this grand beet, for it is backed by over thirty years of careful breeding here on our own farms. As we have said many times, "Every one a model for shape and color." See prices below.

"There are no beets under the sun that compare with Harris' Special Strain Crosby."

Henry L. Arnold, Miller's Mills, N. Y.

Harris' Special Detroit Dark Red

Harris' Special Detroit Dark Red

Best Beet for Late Summer and Fall

No better strain of this fine beet can be obtained. The roots are of excellent globe shape, smooth and very uniform with a solid deep red color that is well liked by canners and market buyers alike. This is a large topped strain, and therefore particularly fine for late summer and fall bunching.

There is no beet quite so satisfactory in all respects as Harris' Special Detroit. See prices below.

Perfected Detroit

Famous For Fine Color

This strain of Detroit Dark Red type is a favorite of canners because of its beautiful dark interior color. The beets are more flattened in shape and not quite as smooth as Harris' Special Detroit but the color is very intense dark red with practically no zoning. The flesh is of excellent quality, being tender and sweet. The tops are large. We highly recommend this stock both for market and canning. See prices below.

	$\frac{1}{4}$ lb.	1 lb.	10 lb.	100 lb.
Beets for Greens. (Green Top).....	\$.35	\$1.10	\$10.00	\$ 90.00
A distinct, rapid growing variety, selected to produce fine tops quickly.				
CROSBY'S EGYPTIAN. Harris' Special Strain. See above.....	.55	1.75	16.50	155.00
DETROIT DARK RED. Harris' Special Strain. See above.....	.55	1.75	16.50	155.00
Early Blood Turnip.....	.40	1.30	12.00
A good old variety. Large, somewhat flattened beets. An early cropper.				
EARLY WONDER. A Superior Strain for Bunching.....	.55	1.75	16.50	155.00
Quite similar to our special strain of Crosby's Egyptian. Early and of good deep red color. Our strain of this variety is exceptionally fine.				
LONG SEASON. Called "Winter Keeper" and "New Century".....	.70	2.25	21.00
A very late variety of extra fine quality. Description in Retail Catalogue.				
LONG SMOOTH BLOOD RED. (True Strain).....	.55	1.75	16.50
8 to 10 inches long and very dark red. Grows half out of the ground.				
PERFECTED DETROIT. See above.....	.50	1.65	15.50	145.00

MANGELS and SUGAR BEETS—For Stock

Six to eight pounds of seed will sow an acre.

See our general catalogue for complete descriptions.

	$\frac{1}{4}$ lb.	1 lb.	10 lbs.
DANISH YELLOW GIANT. The Heaviest Yields.....	\$.50	\$1.50	\$14.00
MAMMOTH LONG RED. The Most Popular Variety.....	.50	1.50	14.00

CABBAGE

One ounce of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

All the Cabbage Seed we offer is **HOT WATER TREATED**. This is a most important step in the control of Black-Leg. Added work for us, but **Insurance for you!**

Golden Acre Cabbage

Golden Acre

The Earliest Variety

The best early market cabbage and one of the most profitable kinds to grow. Our seed of this popular round head variety is the true selected stock which has been so successful in the past. It is very early and uniform and vastly superior to most stocks sold even at higher prices. We recommend it highly. See prices below.

Enkhuizen Glory

Large Heads—for Market and Kraut

One of the best and most popular varieties for medium early crop and kraut. The round firm heads ripen about a week later than Copenhagen Market and are very large, weighing 5-6 lbs. or more. Our strain is outstanding for early production of fine uniform heads. The heavy yields make this a most profitable kind to grow. See prices below.

Marion Market

Yellows Resistant—Copenhagen Type

Great improvement has been made with this stock, so it is now as uniform and true as any of this class. The heads resemble our regular Copenhagen Market and are remarkably uniform. A few days later and a little larger than our regular stock of Copenhagen Market. Should be used wherever there is any indication of "yellows" in your soil. We also recommend it as a good substitute for our Copenhagen Market. See prices below.

"Yellows" Resistant Cabbage

An increasing number of farms each year are showing "yellows sick" soil. Yellows resistant varieties are the only kinds to grow where ground is badly infected with yellows. In many sections where there is slight yellows infection, the ordinary varieties can be grown, but the resistant kinds usually do much better and produce large crops.

Our Yellows resistant varieties have been so carefully developed that you can now grow your favorite type of cabbage in a yellows resistant variety.

We offer these fine stocks:

Golden Acre, Yellows Resistant
Copenhagen Market, Yellows Resistant
Marion Market
Enkhuizen Glory, Yellows Resistant
(Globe)

All Seasons, Yellows Resistant
Wisconsin Hollander
Bugner (Late)

Early and Medium Early Varieties

	Oz.	¼ lb.	lb.
COPENHAGEN MARKET. True Large Headed Stock (Crop failed)
Our strain is larger and more uniform than usual strains of this variety. Heads round, hard and have few outside leaves. Larger and about 10 days later than Golden Acre.			
COPENHAGEN MARKET Yellows Resistant	\$.60	\$1.75	\$6.00
Round heads resembling our strain of Copenhagen Market, but larger and later. Very uniform for shape and size. A most excellent stock for market or kraut.			
Early Jersey Wakefield. Early Pointed Heads45	1.20	4.00
Our strain is particularly fine, the heads being very uniform and early.			
ENKHUIZEN GLORY. See above.50	1.35	4.50
ENKHUIZEN GLORY Yellows Resistant. Globe50	1.50	5.00
This is a fine uniform large heading stock of Enkhuizen Glory type. It should be used on all yellows infested soils.			
GOLDEN ACRE. See above.60	1.75	6.00
GOLDEN ACRE Yellows Resistant50	1.50	5.00
Resistant to yellows, and very even stock of the true Golden Acre type. Ready shortly after our regular strain. Should be used by all who have any "yellows" on their farms. Also a very good type to grow in place of our Copenhagen Market.			
GREEN ACRE (Crop failed)
LARGE LATE COPENHAGEN (Crop failed)
MARION MARKET. Yellows Resistant. Copenhagen Type. See above50	1.50	5.00

Penn State Ballhead

Heavy Yielding Danish Cabbage

This variety is a great favorite in many cabbage growing sections. It is a short stemmed type originated by the Pennsylvania State College and is noted for its solid heads and the big tonnage which it produces per acre.

The heads are medium size, slightly flattened in shape (see photo to the right) and of attractive bright green color. They are excellent for market because of the solidness and fine appearance of the heads and they keep very well in storage.

We have a fine true stock of this popular type which we recommend to our customers. See prices below.

Penn State Ballhead

These heads are very firm and hard.

Danish Ballhead (Short Stem)

For Late Crop and Storage

This is a most excellent strain of the true short stemmed Danish cabbage. It is a very heavy yielding stock producing large crops.

The heads are very uniform for size and shape and of fine appearance. They are very firm and solid making this one of the best kinds to grow for late market and storage. See prices below.

Harris' Ballhead

Harris' Ballhead is famous for its consistently heavy yields. It is a very vigorous stock, producing uniform hard solid heads with great regularity. The heads are round, usually about 5 to 6 lbs. in weight, greener than most Danish, with a slight tinge of purple. Because of its attractive appearance and superior keeping qualities Harris' Ballhead commands the best prices and often sells when the market is slow. See prices below. *Crop very short.*

Late or Main Crop Varieties

	Oz.	$\frac{1}{4}$ lb.	lb.
ALL SEASONS. Yellows Resistant.	\$.45	\$1.20	\$4.00
Especially recommended for "yellows sick" soil where the large semi-flat domestic type for kraut, etc., is wanted. Very highly resistant.			
BUGNER. Yellows Resistant.50	1.50	5.00
Because it is yellows resistant, this old variety is becoming more in demand. It is later than Danish Ballhead, and has larger and more flattened heads. A very heavy producer.			
DANISH BALLHEAD. Intermediate. Large Uniform Heads.60	1.75	6.00*
Heads are deeper and not as flattened as the short stemmed. The color is deeper green. Excellent yields and fine keepers in storage. A most profitable type to raise.			
DANISH BALLHEAD. Short Stem. Heavy yielding strain. See above.70	2.10	7.00
HARRIS BALLHEAD. See above.75	2.40	8.00
PENN STATE Ballhead. True Stock. See above.65	1.85	6.50
Premium Flat Dutch.45	1.20	4.00
SUPER CURLED SAVOY. The Best Variety65	1.85	6.50
Finest Market Gardeners Strain. Closely resembles Chieftain. Fine heads, more savoyed, earlier and more compact plants than most Savoy. This is the most uniform stock we have ever seen and is the type best liked by Long Island growers.			
WISCONSIN HOLLANDER. Yellows Resistant.65	1.85	6.50
The best "yellows" resistant Danish type. Under normal conditions will produce fine crops on "yellows sick" soil where ordinary Danish cabbage will not survive.			
MAMMOTH ROCK RED. Sure Heading Strain.70	2.10	7.00
The largest red cabbage. The heads are hard, medium round and deep red. This is the best red kind for market or shipping.			

Chihli

CHINESE CABBAGE—Chihli

This is the Best Variety.

This is the most popular kind and best for market and roadside stands. It has almost entirely replaced all other kinds. The heads are very attractive, often 18 in. long, uniform in shape and size, hard and firm. This variety is by far the best to grow. A profitable crop on muck, as it commands a ready market, and can also be held in storage for winter sales.

Sow the seed in July or August; the crop matures in 8 to 10 weeks. 1 to 1½ lbs. will sow one acre.

Oz. 45c; $\frac{1}{4}$ lb. \$1.30; 1 lb. \$4.00.

CAULIFLOWER

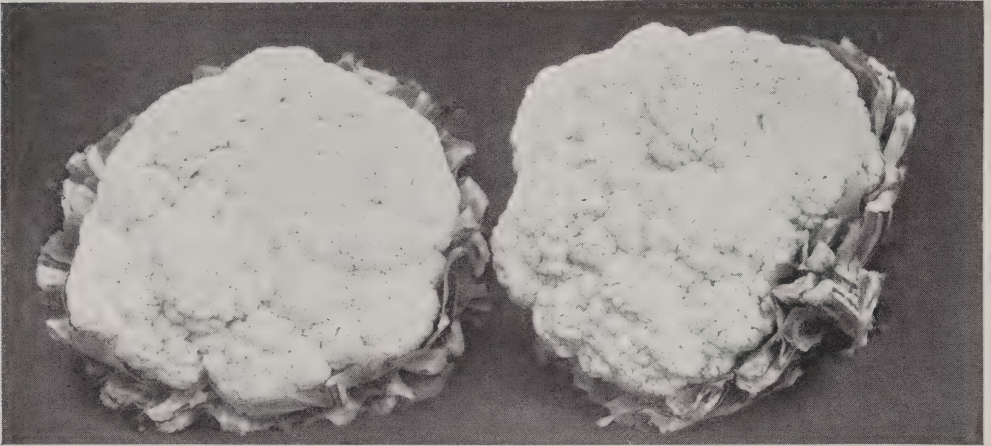

One oz. of seed will produce 1500 to 2000 plants in open ground or about 3000 in frames.

Cauliflower Seed for 1943

Growers of cauliflower should be particularly careful to get only the finest stocks of seed for 1943, and they will do well to buy from sources upon which they can rely absolutely.

We are very fortunate that we have enough seed of the leading varieties of our own special stocks to supply our customers' normal requirements and at reasonable prices. You do not have to pay exorbitant prices for your cauliflower seed as there is no better seed than ours to be obtained at any price.

While we have a good supply of seed we suggest that our customers order their seed early.

Snowball Perfected Strain. *The finest stock of Cauliflower in existence.*

Snowball Cauliflower Perfected Strain

"No better seed can be bought at any price"

This is the stock that it pays to grow! Year after year under good and poor growing conditions our strain continues to produce the largest percentage of fine large uniform number one heads; the kind that bring the top prices. It is recognized by the leading growers in the East as the best cauliflower grown.

The heads are unusually deep and heavy, of uniformly good size, beautifully white with a tight attractive curd.

We are glad to assure our customers that again this year we can supply their usual requirements of this fine strain. See prices below.

Super Snowball—True Stock

Famous for its Large Early Heads

A very early large heading kind. Under favorable conditions of soil and weather, it produces wonderfully fine crops, a majority of the heads being ready during a short period of time.

Cauliflower growers recognize the value of this fine variety and our customers have found that although there are many strains now offered under a large number of names, our seed has never been surpassed.

We strongly advise our customers not to take chances with their Super Snowball, but to use this true proven strain which has been so extremely satisfactory. See prices below.

Snowdrift

Also Called White Mountain and Improved Holland Erfurt

In the same season as Snowball, producing large firm heads which are very white. This variety is popular in many sections and is sold under a variety of names. Ours is an extremely fine true stock which has given excellent results for our customers. We recommend it highly. See prices below.

	$\frac{1}{4}$ oz.	oz.	$\frac{1}{4}$ lb.	lb.
SNOWBALL. Perfected Strain. See above.....	\$1.10	\$3.50	\$12.50	\$45.00
SNOWDRIFT. See above.....	1.10	3.50	12.50	45.00
SUPER SNOWBALL. True. See above.....	1.20	4.00	14.00	50.00
EARLY PURPLE HEAD.....(Crop failed)				

CARROTS

An ounce will sow about 300 feet of row. It requires 2 to 4 lbs. of seed for an acre, depending on how far the rows are apart.

Carrot Seed for 1943

Again for 1943 there is a definite shortage of carrot seed, and much seed of low germination and inferior breeding will doubtless be offered for sale. While our supply of some varieties is limited, we will not sacrifice our standards. We expect to have sufficient seed of our usual high quality to take care of normal requirements, *but we do advise ordering early.*

Nantes Carrot

Nantes—Coreless

This is the attractive *coreless* variety that is used so much for early bunching as well as a topped carrot on many markets. The carrots are six to seven inches long, unusually smooth, nearly the same size the entire length and stump rooted. They are *entirely coreless* and of finest quality. See prices below.

Chantenay

Special Strain—Long—Smooth

This old favorite variety has been much improved in many ways and we now offer an extremely fine stock. The roots are smooth, uniform and *long*—fully an inch longer than the old strains or the Red Cored. The quality is now so much better that this new Chantenay is practically “coreless” and a fine quality carrot in every way. The yield as always is high, and it is a most profitable variety to grow. See prices below.

Red Cored Chantenay

We have an excellent stock of this popular carrot and our customers are highly pleased with it. This stock will produce enormous crops of fine smooth carrots, and has been so improved in recent years that it is practically 100% red cored. It is used both for market and as a high quality kind for canning. Red Cored Chantenay does remarkably well on muck, making a long smooth root of very attractive appearance. See prices below.

	Oz.	¼ lb.	lb.	10 lb.	25 lb.
CHANTENAY. Special Strain—Long. See above.....	\$.35	\$1.00	\$3.00	\$29.00	\$70.00
CHANTENAY, RED CORED. See above.....	.40	1.20	3.50	34.00	82.50
DANVERS HALF LONG. A Heavy Cropper.....	.40	1.10	3.25	31.50
We have a pure heavy yielding stock of this popular variety.					
HUTCHINSON. True New England Type.....	.40	1.20	3.50	34.00	82.50
Produces large roots 9 to 10 in. long, nearly the same size the whole length and stump-rooted. Color light orange. This carrot yields large crops and is used extensively as a topped carrot in the New England area and other large markets in the East. We have a very superior and dependable stock.					
IMPERATOR. Fine for Bunching.....	.45	1.35	4.00	39.00
This fine bunching carrot produces smooth, somewhat tapering roots often eight inches long, of deep orange color. The tops are just right for bunching. Crop short.					
MORSE'S BUNCHING..... (Crop failed)
A long, deep orange carrot which has become very popular for bunching. Almost 100% coreless, smooth and uniform, with good tops for tying.					
NANTES. (CORELESS) See above.....	.50	1.45	4.50	44.00
SUPREME HALF LONG.....	.45	1.35	4.00	39.00
A slender refined coreless strain of Danvers type but smoother and better colored. Uniform and attractive roots. Solid deep orange in color with a very small “red” core. Excellent for both busheling and bunching.					
TENDERSWEET. The Sweetest Carrot.....	.40	1.15	3.40	33.00
This carrot is being grown more and more for market. The roots are large, smooth and tapering, of striking deep orange red color. They are a good bunching carrot and are of very superior quality.					

CELERY

An ounce of seed will produce about 8000 plants. It requires 20,000 plants to the acre.

Cornell 19 (New)

See photo on front cover

High Quality, Resistant, Main Crop Type—New York State Grown Seed

We think this is the finest new celery we have ever seen and predict it will have a tremendously important place. It is a yellow self-blanching type combining all the best qualities of the green Pascal celeries—the stalks are very long, smooth-ribbed and deeply rounded, and the flesh is thick and tender and without strings. The heart is well developed and *the excellent quality is carried even on the outer stalks.*

Developed by Dr. Emerson of Cornell University and already widely tested, Cornell 19 is a great success on both muck and upland. It is resistant to yellows and the growth is vigorous and healthy producing very large yields. We recommend it especially for main crop as it tends to produce seeders if planted too early. The stalks blanch quickly and hold up well in storage.

We offer New York State grown seed produced directly from the latest selection of stock seed furnished by Dr. Emerson. The plants are extremely uniform and we confidently urge our customers to make a planting of Cornell 19 this year. See prices below.

Golden Plume or Wonderful—Original Strain

This is our original type of Golden Plume which has proved so successful with our customers. The stalks are very large with remarkably heavy hearts and with thick solid stems.

Many of the best celery growers in the country get their seed of Golden Plume from us. They find that they can get best results without having to pay a fancy price for their seed. See prices below.

Masterpiece—Early—Golden

Since its introduction a few years ago this fine early variety has become very well liked by celery growers. The plant is robust and fairly tall with long (8-9 in.), broad, very thick rounded stems. The quality is superior being tender, free from strings and of the finest flavor. Masterpiece is well worth growing. See prices below.

Masterpiece Celery

Uniform thick stalks of fine flavor.

		½ oz.	oz.	¼ lb.	lb.

MASTERPIECE. (New) See above.....	¼ oz. 40c	.65	1.25	4.25	15.00
SUPREME GOLDEN. New Tall Type	¼ oz. 35c	.55	1.00	3.40	12.00
Taller and earlier than the old Golden Self-Blanching which this has now displaced. The stems are long, thick and make a good heart. The plant is very compact and erect, making an excellent pack.					
SUPER PLUME. (New)	¼ oz. 35c	.55	1.00	3.40	12.00
Similar to Golden Plume but slightly earlier, with thicker stems and better quality. Stems 8-9 in. firm and crisp. Blanches quickly but stands up well.					

Green Varieties

EASY BLANCHING. "Newark Market" or Sanford Superb35	.60	1.75	6.00
It has the same dwarf, compact habit of growth as Golden Self-Blanching, and is of fine quality. Leaves are green and the stalks blanch white.					
GIANT PASCAL. Special Strain. (Late)35	.60	1.75	6.00
Largely used in New England and is considered one of the very best for late winter market. The stalks are large, solid and blanch pure white.					
SALT LAKE or UTAH. The Favorite Green Celery45	.85	2.85	10.00
One of the finest kinds for fall crop. The stalks are very thick, crisp and of highest quality. We have a beautiful stock.					
SUMMER PASCAL. New—Early—Green. See below... ¼ oz. 60c		.90	1.75	5.50	18.00

Summer Pascal—New, Early Green Celery of Superior Quality

Because of its earliness, fine quality and attractive appearance, this new celery has become very popular in New England, Pennsylvania and other sections where green celery is grown. The plant is medium tall, very uniform with long, thick, rounded stalks. The stems blanch quickly and are of the finest quality. This is an early variety, ripening shortly after Easy Blanching.

Our strain is the best of many we have grown and tested. See prices above.

CELERIAC—Turnip-Rooted or “Knob” Celery

LARGE SMOOTH PRAGUE. This is the standard market garden variety, producing good size bulbs of the finest type. Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

SWEET CORN

One pound of seed will plant 350 to 400 hills; 10 to 12 lbs. will plant an acre. A bushel weighs 48 lbs.

Harris' Northern Grown Sweet Corn

For many years we have made a specialty of growing both hybrid and open pollinated sweet corn seed here in the North on our own and nearby farms. Combining scientific breeding and careful selection with the greatest care in growing, drying and cleaning, we produce seed corn of the highest standard of vitality and purity. Harris' Northern grown sweet corn is the best obtainable.

HYBRID SWEET CORN

The large number of hybrid varieties now offered make it difficult for the grower to select the best. Each year we thoroughly test many of these and we now offer seven hybrids which we have chosen as the best, covering the season from extra early to late or main crop. Our hybrid corn is grown from proven pure line parents and great care is taken in detasseling the seed parent.

Hybrid corn cannot be saved for seed the next year as it will break down.

Seneca “60”—The Earliest Hybrid (65 days)

This is the earliest variety we offer, and very valuable for extra early crop. It ripens with us in 65 days, and we have seen it mature under ideal conditions in sixty days.

The stalks are 4 to 4 $\frac{1}{2}$ feet tall, with eight rowed, golden yellow ears about 6 inches long, and ripening a large part of the crop over a short period of time. Not resistant to Stewart's Disease. See prices on page 13.

North Star

New Extra Early Hybrid (67 days)

This new Harris' Hybrid introduced by us in 1941 is already a tremendous success. It ripens only a few days after Seneca 60 yet has the same fine large ears as many later varieties, and growers everywhere praise it in glowing terms. They like its rapid and vigorous growth, the enormous yield and the large delicious ears.

The kernels are deep, creamy gold and exceptionally tender and sweet. Ears are fully 7 inches long, mostly 12 rowed, and well protected by a fine large husk which makes them most attractive. The ears sell at a premium on sight, and the wonderful flavor and tenderness brings the customers back for more. See prices on page 13.

Note: While we have a good supply of seed for this year, we expect a very heavy demand and urge our customers to order early and avoid disappointment.

Northern Cross

An Early and Tremendous Yielding Hybrid (73 days)

Since its introduction by us in 1938 this hybrid has proved to be a money maker for the grower. It is a variety of great vigor with fine strong sturdy plants which will produce great crops of large even ears. There are usually two and often three good ears to a plant. It is truly a tremendous yielder of fine large ears and is well suited to fill the gap between the extra early and later kinds.

These large ears are very uniform in size, usually eight inches long with 12-14 rows of bright yellow kernels. They are very attractive in appearance and of exceptionally high quality.

Caution: Northern Cross is not resistant to Stewart's Disease (wilt). See prices on page 13.

Marcross C6.13—Early—Uniform Large Ears—Wilt Resistant (68 days)

Popular early hybrid ripening a day or two later than North Star and noted for its remarkably uniform large ears. The stalks are short and sturdy and the ears are 12 rowed, about 7 inches long with light golden yellow kernels of very good quality.

The strain we offer is a most uniform and attractive stock, and we recommend it highly. Completely resistant to wilt (Stewart's Disease). See prices on page 13.

SWEET CORN continued on next page.

North Star

These large ears are sweet and tender.

Early Bancross 39 (74 days)

Has proved a winner for growers who want a large uniform ear maturing before Golden Cross Bantam. They are practically the same size and shape and are ready fully *ten days earlier*.

The plant is rugged and prolific, with the majority of the plants producing two good ears. It is moderately resistant to Stewart's Disease (wilt), and has produced large early crops where other corn has failed entirely.

Our seed of this new hybrid has been produced under our careful supervision by a top cross of Purdue 39 on our *own* selected stock seed of Harris' Extra Early Bantam. This corn should be sown at the same rate as the open pollinated varieties. See prices on next page.

Ioana

Large ears of fine quality.

Golden Cross Bantam

High Yielding—Finest Quality (84 days)

One of the first Hybrid corns to be developed and still unsurpassed. It is now universally recognized as the standard high quality midseason type. The demand has been so great that many inferior stocks are being offered and growers should be particularly careful to get their seed from reliable sources. Our strain is the best obtainable and is outstanding for uniformity and high yield. Every pound was grown here in Western New York from tested pure line parents and the seed rows were thoroughly detasseled.

This stock will produce large crops of beautiful ears of remarkably uniform length (about 8 in.) and with 12 rows of bright golden yellow kernels. They mature about a week later than the old fashioned Golden Bantam with the whole crop ripening at nearly the same time.

For best results sow not more than six pounds per acre.
See prices on next page.

Ioana

Large Eared—Midseason—Wilt Resistant (86 days)

Developed by Dr. E. S. Haber of Iowa State College, this outstanding new hybrid has been welcomed by sweet corn growers as an exceptionally fine large eared variety for main crop.

The ears are large, slightly tapering, mostly 8 to 9 inches long with 12 to 14 rows (a few 16) of creamy yellow, medium deep kernels, which fill the ear well at the tip.

These large attractive ears are of fine quality being sweet and tender. The plant is tall and strong and is *resistant to Stewart's Disease (wilt)*.

In some sections where large crops of sweet corn are grown for market, some of our customers prefer it even to Golden Cross Bantam. See prices on next page.

"I have been buying your seeds for the past 28 years with excellent results. During that time you have introduced many fine strains of sweet corn, but I think your Ioana is the best of any. I have a great many private customers and all of them say it is the sweetest corn I have ever sold them."

Evan J. Robinson, Alden, N. Y. Jan. 12, 1942.

Harris' Extra Early Bantam—Heavy Yielding—Very Early (68 days)

Introduced by us in 1927; this has proved one of the most profitable varieties for the grower ever offered. In spite of the growing demand for larger ears in some markets, many growers find that because of the earliness, large yield and superior quality, Harris' Extra Early Bantam is still on their "*must grow*" list. It is not only an extremely heavy yielder but is one of the earliest varieties maturing ears which can be sold at high prices before the market becomes flooded.

The ears resemble true Golden Bantam in size and shape and high quality but mature ten days earlier. They are up to 7 in. long with 8 to 10 rows of golden yellow kernels and are very uniform in size and appearance. See prices on next page.

When Different Varieties Mature

We give after the names of the different varieties listed in this catalogue the approximate number of days in which the corn matured in our trials that were planted about the middle of May. As the time required varies greatly according to the weather, time of planting, and fertility of the soil the figures should be regarded as relative rather than actual.

Whipple's Yellow

Harris' Original Northern Grown Strain.

A Leader for over 20 Years (77 days)

We are the *original* introducers of Whipple's Yellow Corn and since its introduction in 1920 we have constantly bred and selected it for earliness, uniformity of size and high yield.

We have seen many other stocks of Whipple's Yellow grown in comparison with our own, and without exception ours stands head and shoulders above all the rest. *You cannot afford to grow just an ordinary strain of this fine corn.*

Every pound of this variety which we sell is grown here in the North, on or near our own farm under our supervision from our own carefully bred stock seed. See prices below.

"Used the Whipple's Yellow last year and liked it very much."

Craig Morton, Allenwood, N. J. Jan. 27, 1942.

SWEET CORN—Yellow Varieties

Note: 25 lbs. or more of any one variety will be supplied at the 100 pound rate.

*At the prices here quoted, sweet corn is not prepaid. Purchaser pays transportation on sweet corn except as follows: If your order for vegetable seeds, including corn, amounts to \$20.00 or more we will prepay the FREIGHT charges. See also inside front cover.

Large yellow kernels, the most popular in many markets.					
JAPANESE HULLESS30	1.65	3.00	10.20	17.00
The earliest kind. Small white kernels.					

A bushel weighs 60 lbs. 8 lbs. will plant an acre. 25 lbs. or more of one variety will be supplied at the 100 lb. rate.

CUCUMBERS

$\frac{1}{4}$ lb. of seed will plant about 300 hills or 200 ft. of row.
It requires about 2 lbs. per acre in hills or 3 to 4 lbs. drilled.

Harris' Perfection

Harris' Perfection—The Grandest Long Green White Spine

If you want enormous yields of fine cucumbers, grow Harris' Perfection.

The fruit is straight, smooth and handsome, deep green in color with small white rays at the blossom end, and retains its deep green color for a long time after picking. The cucumbers will average well over eight inches long when ready for market and are just the right thickness.

Since we introduced Harris' Perfection in 1916, we have kept the stock under our entire control, working constantly to improve the type, yield and uniformity. Even though there have been several very fine varieties of this type introduced in the past few years, many of our customers still prefer Harris' Perfection because of its heavy yield and fine appearance.

This variety is adapted for dill pickles as well as for general market. See prices below.

A & C

Long, Slender, Dark Green

The long slender shape and handsome dark green color have made this one of the most popular cucumbers grown today.

The cucumbers are 8 to 9 inches long, beautifully proportioned, smooth and dark green, making a very fancy pack. The vines are healthy and produce large crops of the finest fruit.

Our strain is outstanding for uniformly fine shape and color, and we recommend it highly. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.

STRAIGHT EIGHT. See next page.....	.25	.70	2.25	21.00	195.00
West India Gherkin.....	.25	.75	2.50

Straight Eight—A Very Prolific Long White Spine

Has become very popular among growers because of the large yield of fine straight cucumbers. When ready for market the cucumbers are 8 to 9 inches long, straight, smooth and blunt ended. The color is medium dark green with green rays at the blossom end. We can recommend Straight Eight for a money making crop. See prices on preceding page.

Harris' Double Yield

Now better than ever!

This year we proudly announce an improved strain of this famous variety. The yields are even more tremendous than before and the uniformity and perfect shape make it ideal for small pickles.

The cucumbers are very straight with blunt ends, smooth, cylindrical, and medium deep green in color. The fine shape is carried on all sizes of fruit. (See photo.)

If the pickles are kept picked off, the vines produce astonishing crops. Young cucumbers are often produced in clusters of 3 or 4 like the fingers of your hand.

This is also the earliest variety we know and many growers use it for early slicers; it matures to slicing size two weeks earlier than other kinds. See prices on preceding page.

Harris' Double Yield Pickles

Irondequoit Hothouse—Greenhouse Grown Seed

This is the famous variety which has been developed by the greenhouse growers around Rochester. The seed has been saved for us from perfect fruit grown under glass by an expert cucumber grower in Irondequoit. It will produce remarkably fine uniform cucumbers. The fruit is long, slender, and deep green, almost entirely solid, having very few seeds. The vines are vigorous and very prolific. 100 seeds 75c; 250 seeds \$1.75; 500 seeds \$3.25; 1000 seeds \$5.50.

WITLOOF CHICORY—French Endive

WITLOOF CHICORY. Special Forcing Strain. An exceptionally fine strain, grown from selected roots and produced by us here on our farm. Will give a high percentage of perfect heads when forced. Oz. 50c; $\frac{1}{4}$ lb. \$1.50; lb. \$5.00.

COLLARDS

GEORGIA. Large cabbage-like leaves, which grow loosely on stems $2\frac{1}{2}$ -3 ft. tall. Does not form heads. May be sown in spring and transplanted like cabbage or drilled in June or July. Popular in the South for table use and stock feeding. Oz. 15c; $\frac{1}{4}$ lb. 35c; lb. 90c; 10 lbs. \$8.00.

CRESS

EXTRA FINE CURLED—Also called Pepper Grass. Oz. 40c; $\frac{1}{4}$ lb. \$1.25; lb. \$3.50.

DANDELION

Large Thick Leaf

This strain is the thick leaf, dark green variety, with strong, upright growing plants and good hearts. We now offer high germinating seed of our own growing. Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00; 10 lbs. \$55.00.

Improved Arlington

This is the finest strain of the Arlington type, white ribbed. Leaves very dark green, thick and attractively cut. Plants not as upright as above. True seed produced on our own farm.

Oz. 60c; $\frac{1}{4}$ lb. \$1.75; lb. \$6.00; 10 lbs. \$55.00.

DILL

LONG ISLAND MAMMOTH is much superior to the common dill, being larger and more productive.

Oz. 15c; $\frac{1}{4}$ lb. 45c; lb. \$1.50; 10 lbs. \$14.00.

Large
Thick Leaf
Dandelion

EGG PLANT

An ounce of seed will produce about 2000 plants.

Black Beauty—Prolific Strain

We can strongly recommend this stock as it is the finest strain of Black Beauty that we have ever seen. The plants are strong and sturdy, producing an abundance of uniformly large handsome dark purple fruit even here in the North. See prices below.

	Oz.	¼ lb.	lb.
BLACK BEAUTY. True Stock. See above.....	\$.50	\$1.50	\$5.00
EARLY LONG PURPLE. (Crop failed)
Fruit 7 to 9 in. long, not over 2 to 3 in. through. Early and very prolific, deep purple.			
NEW HAMPSHIRE HYBRID. Extra Early and Prolific.55	1.60	5.50
Very early and especially valuable for growers who have difficulty producing egg plants profitably in the North. The fine dark fruit is oval in shape and medium size. It ripens earlier than Black Beauty and is remarkably prolific, single plants sometimes producing 8 to 10 good size fruit.			

ENDIVE

An ounce of seed will sow about 100 feet of row; 2 to 2½ lbs. per acre.

	Oz.	¼ lb.	lb.
DEEP HEART FRINGED. Broad fringed leaves. (New).	\$.20	\$.55	\$1.75
An entirely distinct type, recently introduced and very popular. Large and robust plants with broad fringed leaves and upright growth. Produces a fine deep heart when fully grown.			
GREEN CURLED PANCALIER. Best for Late Market. Pink Ribbed.15	.45	1.50
The leaves are not so finely cut as the Green Curled. Has fuller, heavier hearts. A favorite of market gardeners. This variety does best on rich soil.			
GREEN CURLED. Also called "Chicory." Green ribbed.15	.45	1.50
Leaves finely cut and curled. Exceptionally uniform with a fine heavy heart.			
FLORIDA DEEP HEART.15	.45	1.50
Broad leaves, dark green, slightly curled, produces large deep heads, which blanch well in the center. One of the best varieties, especially for late market.			
FULL HEART BATAVIAN (Escarolle). True Dark Green Strain.15	.45	1.50
Our strain of this variety produces heads which are tightly packed with broad dark green leaves. The full hearts blanch to a beautiful golden color.			

French Endive—Witloof Chicory See under *Chicory* on preceding page.

FENNEL

FLORENCE. An exceptionally fine strain, producing large bulbs. Oz. 25c; ¼ lb. 75c; lb. \$2.50.

GARLIC

The bulbs should be separated into flakes or "cloves" and set out like onion sets. Bulbs for planting: Lb. 40c; 5 lbs. or more at 35c per lb. Transportation paid.

HERBS

For Flavoring, etc.

	Oz.	¼ lb.	lb.		Oz.	¼ lb.	lb.
Basil. Medium leaf.	\$.75	\$2.50	Summer Savory.	\$.75	\$2.50
Borage.25	.75	\$2.50	Sweet Marjoram.	(Crop failed)		
Dill. See page 15.15	.45	1.50				

KALE

One pound of seed will sow about one acre of land.

	¼ lb.	lb.	10 lb.
DWARF CURLED or Blue Scotch.	\$.70	\$2.25	\$21.00
Very fine curled leaves, of dwarf habit and deep bluish green color.			
SIBERIAN. Also called "Sprouts".65	2.00	18.00
Dwarf spreading, broad leaves curled only at the edges. Color blue gray. Very hardy.			

KOHL RABI

An ounce of seed will sow about 200 ft. of row.

EARLY WHITE VIENNA. Round white bulbs, early. A very uniform stock. Can be used 10 weeks after sowing. Oz. 50c; ¼ lb. \$1.50; lb. \$5.00; 10 lbs. \$45.00.

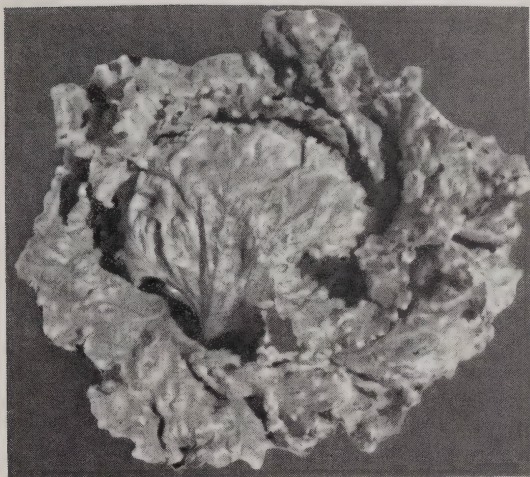

LEEK

An ounce of seed will sow about 200 feet of row.

AMERICAN FLAG or GIANT MUSSELBURG. The stalks are large and very sturdy. The bottoms are clear pearly white and smooth with the white part extending well up the stalk. Crop very short. Oz. 75c.

LETTUCE

An ounce of seed will sow 250 ft. of row; about 2 lbs. per acre.

Imperial 44

Imperial 44

Sure Heading "Iceberg" for the East

Imperial 44 is the outstanding "Iceberg" type to grow in the East and is the variety which does best on a wide range of soils, both upland and muck. It produces crops that compete successfully with western grown Iceberg. Not only does it head better than any other strain but it has shown some resistance to tip burn. We have seen trial rows cut 100% good heads in July and commercial crops fully 90%.

The head is true Iceberg type, solid and of fine quality. Muck grown heads are usually a little larger than on upland. See prices below.

"Imperial 44 is the first head lettuce I have been able to raise here, and it is a good one."
E.P. Gasser, Sandy Lake, Pa. July 20, 1942.

White Boston—Special Strain

Year after year this has proved to be a most dependable stock. One of the outstanding features of our strain is the uniform manner in which it heads, so that there is practically no waste in cutting a crop. It has proved to be more resistant to tip burn than any variety we have ever seen.

You cannot get a better strain of White Boston Lettuce no matter what you pay for the seed. Our stock is fully equal to any strain obtainable. See prices below.

	Oz.	¼ lb.	lb.	10 lb.
BIG BOSTON.				
We recommend White Boston to growers who have been using this strain.				
Black Seeded Simpson. Excellent Loose Leaf Type.....	\$.15	\$.45	\$ 1.50	\$ 14.00
Chicken. Immense leaves. Use for green feed for chickens.....	.15	.40	1.25	10.00
COSBERG (New). Fine quality.....	.30	.90	3.00	27.50
Cross between Cos and Iceberg types. See full description in general catalogue.				
GRAND RAPIDS.20	.55	1.75	15.00
Excellent for outdoor as well as greenhouse growing and is used by the most critical growers. The leaves are light green, uniformly well curled.				
GRAND RAPIDS U. S. No. 1.20	.60	1.80	17.00
This strain has proved to be a very superior forcing and outdoor variety where a leaf or "curly" lettuce is desired. The plants are a little more robust than other strains and fill out more. Very uniform for size and well curled.				
IMPERIAL 44. (New) See above.....	.35	1.00	3.25	30.00
IMPERIAL 847. Black Seed.25	.70	2.20	20.00
Known for its ability to produce fine solid heads of "Iceberg" type. Will produce good heads in July as well as early spring and fall. Heads larger than Imperial 44 and a little later. Popular with many growers.				
May King. For Frame Forcing.25	.65	2.00	18.00
A very early head lettuce for open ground or forcing.				
NEW YORK No. 12.20	.60	1.85	17.50
NEW YORK No. 515. Improved "Iceberg" Type.25	.70	2.20	20.00
Earlier than New York No. 12 and preferred by most growers. Recommended for upland growing only. Heads are large and solid. This is the sure heading strain which has pleased our customers for a number of years.				
WHITE BOSTON. Special Strain. See above.....	.25	.65	2.00	18.00
Cos or Romaine Lettuce				
TRIANON SELF-FOLDING.20	.55	1.75	15.00
The most popular variety, making large long heads of fine quality and attractive appearance. Used for forcing under glass and outdoor culture.				
DARK GREEN COS.20	.55	1.75	15.00
This strain has the same upright self-folding type of head as Trianon, but is not quite as tall and the leaves are of darker green color. The heads are cylindrical and very solid. Well liked for fall planting as it stands frost well.				

"Have used your seeds for 25 years or over with excellent success."

M. R. Matthews, Hammond, La. May 8, 1942.

MUSKMELONS or Cantaloupes

An ounce of seed will plant about 50 hills; 2½ to 3 lbs. per acre.

Harris' Muskmelon Seed

Growing seed of early, highly productive and fine quality muskmelons for northern Market Gardeners has been one of our specialties for over twenty years. Our fields have been remarkably free from disease and our special strains are now considered the standard of excellence. You can be sure that these are the best muskmelons for the North.

Delicious

The Earliest Large Melon

This fine melon is becoming more and more popular for local markets and roadside stands. It is the earliest large melon of high quality grown, and we recommend it most highly. As it will not stand long distance shipping, we do not recommend it for this purpose.

Our strain is noted for earliness, large yield, vigor of vine, uniform size and type, and remarkably sweet flavor. If you grow melons, plant some Delicious. See prices on next page.

We all like to check the melon trials.

Bender's Surprise

Harris' Special Northern Grown Strain

This is still the leading large melon for the East, and our strain has as yet no equal for combined large size, attractive appearance, fine flavor and long keeping qualities.

We have bred and grown this stock for over twenty years here on our own farm always paying special attention to high quality, earliness and trueness of type. This careful selection has made ours the *one* outstanding stock of this variety.

Although this is *not* the true old Irondequoit, which has practically disappeared from trade, growers and consumers refer to this variety now when they say "Irondequoit" melons.

There is no use buying inferior seed when Harris' Northern Grown Bender's can be purchased at the low price we charge. See prices on next page.

Market King

A Fine Quality Melon for Market and Shipping

These melons are so remarkable for their uniform sweetness and high flavor that one can actually cut hundreds without finding a poor melon. For this reason alone many growers are changing to Market King each year. This is an exceptionally good variety for shipping as well as for local market.

The melons are medium size, grow very evenly, and are extremely heavily netted. They are oval in shape without deep ribs. The skin turns to a creamy yellow when ripe. The flesh is very thick with a small seed cavity, deep orange in color and of fine texture.

The vines are more healthy and vigorous than any kind we have seen, producing an enormous yield of fine fruit. This melon ripens normally a week later than Honey Rock and a few days later than Bender's Surprise.

Our crop this year was particularly fine, and we are pleased to offer disease-free seed of high germination. See prices on next page.

Market King

Thick fleshed and delicious.

HOTENTS for Melons

These large strong field forcers are ideal for vine crops such as melons and cucumbers. Economical and practical. Used by successful grower everywhere. See Inside Back Cover.

MUSKMELONS — *Continued*

	Oz.	¼ lb.	lb.	10 lb.
ARISTOCRAT. Superb Quality	\$.35	\$1.00	\$3.25	\$30.00
Large melons with very thick flesh of unexcelled quality. Does not keep well enough for general shipping, but at roadside stands with discriminating trade it will command highest prices because of the fine quality and appearance.				
BENDER'S SURPRISE. Harris' Special Strain. See preceding page.....	.30	.90	3.00	27.50
DELICIOUS. The Earliest Large Melon. See preceding page.....	.30	.90	3.00	27.50
HALE'S BEST. For Distant Markets.15	.45	1.50	14.00
The earliest and best of the Rocky Ford type for the East. Medium size, oval fruit. Very heavily netted. Flesh thick, deep orange and of finest quality. Ours is an excellent stock with fruit that is remarkably uniform in size, shape and quality.				
Hearts of Gold (Large strain)25	.75	2.50	22.50
A fine melon for shipping, medium in size, round and well netted. Flesh thick, orange yellow, of uniformly excellent flavor. We have a fine stock of the large strain of this well known variety.				
HONEY ROCK or SUGAR ROCK25	.65	2.00	18.00
We have a fine stock of this popular melon which is largely grown in many sections because of its attractive appearance, fine flavor and ability to stand handling. The melons are nearly round, about 5" in diameter.				
MARKET KING. See preceding page.....	.30	.90	3.00	27.50
Queen of Colorado or Pride of Wisconsin25	.75	2.50	22.50
Similar to A & C, Jersey Gold, etc. This is a true, heavy bearing stock which we are sure will give entire satisfaction.				

WATERMELONS

An ounce of seed will plant about 25 hills; 2 to 3 pounds to the acre.

The varieties we have listed here are all suitable for growing in the North, as they are early kinds and in our climate under usual conditions will produce ripe fruit before frost from seed sown in the open ground. See our general catalogue for full descriptions.

	Oz.	¼ lb.	lb.	10 lb.
DIXIE QUEEN	\$.20	\$.55	\$1.75	\$16.00
Early and very productive. Skin light green with darker stripes. Flesh deep pink, of fine quality. Stands up well for shipping and an excellent kind for local market or shipping. True stock.				
HUNGARIAN HONEY. The Sweetest Watermelon15	.40	1.20	11.00
STONE MOUNTAIN. Try This One For Market15	.40	1.20	11.00
Large, oval somewhat flattened ends. Fine quality and prolific.				
WINTER QUEEN. White Skin—Long Keeper15	.40	1.20	11.00
WONDER MELON15	.40	1.20	11.00
The largest and best of the oblong varieties for growing in the North. They are early, dark green with bright red flesh of fine quality. Will produce large crops even when the seasons are short.				
GREEN CITRON or Colorado Preserving15	.30	1.00	9.00
Not a true watermelon, outer flesh is used in preserving. Very prolific. Green seeded.				

MUSHROOM SPAWN

Full directions for growing are sent with each order of spawn.

Finest pure culture spawn, absolutely fresh. Mushrooms can be raised in cellars or under greenhouse benches where the temperature can be kept between 50 and 60 degrees.

Ours is pure culture spawn grown by one of the largest mushroom producers.

BOTTLE SPAWN. (White). Grown in bottles under sterile conditions after which the bottle is removed and the spawn packed in a carton. One carton will spawn 40 sq. ft. of bed.

Price: Single Carton \$1.35; 3 cartons \$3.45. Prepaid. Not prepaid: 10 or more cartons at 90c per carton. Weight per carton about 1 lb. *Write for prices on larger quantities.*

MUSTARD

An ounce of seed will sow about 300 feet of row.

	Oz.	¼ lb.	lb.	10 lb.
FORDHOOK FANCY. (Long Standing)	\$.15	\$.45	\$1.50	\$14.00
Leaves are slightly smaller and more finely cut and curled than the Southern Curled. A very pure stock.				
LONG STANDING. (Southern Curled)15	.45	1.50	14.00
Will stand without bolting to seed for a long time. During the hottest part of the summer this variety has stood for three weeks after it was large enough to cut, without going to seed. The leaves are a medium dark green with beautiful finely curled edges.				

OKRA or GUMBO

PERKINS' LONG-POD. Standard Market Variety. Large green pods. Ours is a true uniform stock. *An ounce of seed will sow about 50 feet of row. Oz. 15c; ¼ lb. 25c; lb. 70c.*

ONIONS

An ounce of seed will sow 125 feet of row. It requires 5 to 6 lbs. of seed per acre.

Onion Seed for 1943

Seed of this important vegetable is again short because of the heavy demand. While we have fairly good supplies of the leading varieties, we urge our customers to order early.

You can buy Harris' onion seed with every confidence. We will not handle seed of inferior quality or poor germination under any circumstances.

Early Yellow Globe

The Best Early Yellow Onion

Earliness, enormous crops, fine appearance and unusually good handling and keeping qualities have made this variety the leading early onion both for upland and muck.

The onions mature at least two weeks before Brigham Yellow Globe, are nearly globe shaped, deep yellow in color and with a good skin.

We are pleased to be able to offer our customers the same stock of Early Yellow Globe which has produced such fine crops for our customers during the past nine years. See prices on next page.

"I was delighted with the results obtained with your seed last year. The best results I have ever had." Horace W. Burroughs, Cambridge Mass. Mar. 23, 1942.

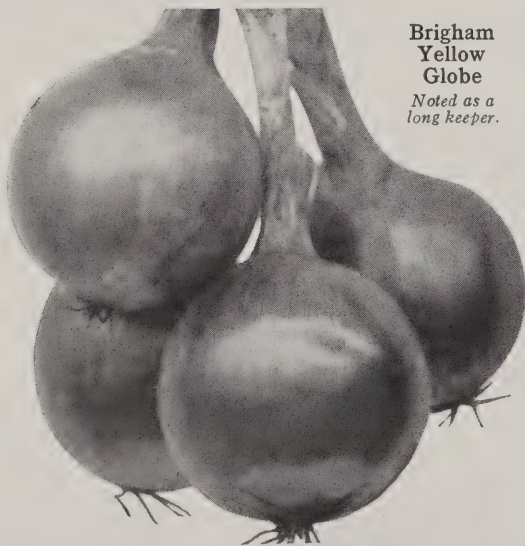

This fine crop of Early Yellow Globe yielded over 1000 bu. per acre.

Riverside Sweet Spanish—Utah Strain

Large Mild Sweet Onions of Finest Quality

This fine large onion can be grown almost anywhere in the East and is becoming more popular each year. It is an excellent variety both for upland and muck. The onions are large and handsome often weighing a pound or more and are fine keepers.

They require a little more time than the early varieties but are vigorous, hardy growers, withstanding adverse growing conditions better than any other kind we know. See prices on next page. See also plants on next page.

Brigham
Yellow
Globe

*Noted as a
long keeper.*

Brigham Yellow Globe

*Also called "Michigan Onion"
and "Michigan Strain"*

The Best Variety for Storage

This remarkable onion together with Early Yellow Globe has practically taken the place of all other kinds in the East and Middle West for growing on muck and is also a very popular upland variety.

It is outstanding because of the large yields obtained, the fine rich golden color together with a heavy thick skin which makes it the best variety for storage.

The seed we offer is of the true *Brigham Strain*, deep globe in shape and even more uniform for type and size than it was when first introduced. See prices on next page.

GERMINATION TESTS: Every package of Harris' Seeds is marked with the germination test. We shall be glad to tell any onion grower how our seed germinates in our tests before he buys the seed.

Harris' Onion Sets

We supply clean, firm, uniform and true to name onion sets. These are the best onion sets that can be obtained. See prices and varieties under ONION SETS on next page.

ONIONS — *Continued*

	Oz.	¼ lb.	lb.	10 lb.	100 lb.
BRIGHAM YELLOW GLOBE. Also called "Michigan Onion." See preceding page.....	\$.50	\$1.50	\$5.00	\$49.00	\$465.00
EARLY YELLOW GLOBE. Best early globe onion. See preceding page.....	.50	1.50	5.00	49.00	465.00
EBENEZER. Grow for sets..... This very fine yellow onion will keep all winter and has a mild, pleasant flavor. They are flattened and of a light, yellow color. It is important to get the true Ebenezer. We have it.	.50	1.35	4.50	44.00	415.00
JAPANESE BUNCHING. Large straight onions..... Make 3 to 5 large straight mild white onions to a plant, is a rapid grower and produces marketable "bunch" onions very early. When fully grown, the onions are nearly an inch in diameter.	.60	1.75	6.00	57.50
SOUTHPORT RED GLOBE. The Best Red Onion..... Large, perfectly round, deep red onion; keeps well and is by far the best red variety. Ours is a very superior stock. Crop short.	.60	1.90	6.50
SOUTHPORT WHITE GLOBE. (The Finest White)... The largest and finest white onion. A very profitable variety for experienced growers as it always commands the highest prices.	.55	1.60	5.50	53.50
RIVERSIDE SWEET SPANISH—Utah Strain. See preceding page.....	.65	2.00	7.00	67.50
WHITE PORTUGAL or SILVERSKIN. Standard for Bunching..... Early flat, white onions of mild flavor. Excellent for pickling and early green onions.	.60	1.75	6.00	57.50

ONION SETS

One peck of sets will plant 600 to 700 feet of row. Use 12 to 20 bu. per acre.

EBENEZER. The Best Yellow Sets. True Stock. Pk. (8 lbs.) \$2.25 Transportation paid. Not paid, Bu. (32 lbs.) \$5.25; 2 Bu. \$10.30; 10 Bu. or more \$5.00 per Bu.

WHITE or SILVERSKIN. Best for bunching. Pk. (8 lbs.) \$2.75 Transportation paid. Not paid, Bu. (32 lbs.) \$6.50; 2 Bu. \$12.50.

Note: We will not ship onion sets until in our judgment danger of freezing is past, unless we are specifically instructed to do so.

ONION PLANTS

Sweet Spanish—Utah Strain

These plants which are grown in Texas have proved excellent for raising both early green onions and dry bulbs for late summer sale. When set in the spring, they will produce large firm onions of the finest type in 8 to 10 weeks.

Each year more gardeners find it profitable to grow onions from our plants, and our sales have steadily and rapidly increased. Experience has shown that Sweet Spanish is the only satisfactory kind, so we do not offer any other variety.

Please note: Onion plants are sold on the basis of bunches only. In Texas they are pulled by the handful, and each handful is called a bunch. 60 of the bunches are packed in a crate and shipped to us. The number of plants in a bunch usually runs from 50 to 100 depending largely on the size of the plants, and it is impossible for us to specify the number of plants in a bunch.

Price: 10 bunches \$2.50 transportation paid. Not paid, full crate (60 bunches) \$8.00. (Weight about 30 lbs. per crate.)

Write for prices on larger lots, which may be shipped direct from Texas.

Shipping onion plants: Can be supplied between April 15th and May 25th only. Please state on your order when you would like the plants to be sent, and we will make every effort to ship at that time. Because of the weather and possible transportation difficulties, we may not be able to ship promptly, but we will do our very best to get them to you as near the proper time as possible.

"Had good success with your onion plants last season. Most of the onions averaged about a pound each. Also find them excellent keepers."
William L. Burger, Schenectady, N. Y.

A single bunch of our Sweet Spanish Onion Plants

PEAS

One pound of peas will plant 100 ft. of row. Two to five bushels per acre.

*At the prices here quoted peas cannot be sent prepaid. Purchaser pays transportation on peas except as follows: If your order for vegetable seeds including peas amounts to \$20.00 or more we will prepay the freight charges.

Greater Progress (New)

See photo on back cover

We think this is the most uniform and attractive stock of peas we have ever seen. As the name implies, it is an improved Laxton's Progress, and with us it is two days earlier, bears more uniformly large pods and a heavier yield.

The vines are not tall, only about 18", but they are husky and literally loaded with large well filled deep green pods (4-4½ in.). They ripen only a few days after World's Record and they mature evenly over a very short period. The pods are all of the same uniform large size giving a most handsome appearance when picked for market. We urge our customers to grow some of this fine new kind this year. See prices below.

World's Record—Earliest Large Podded Peas

Earliness, fine quality, large pods, heavy yield—these are the reasons why World's Record is so tremendously popular today. Without question it is recognized by the best growers as the most profitable for their early crops. The pods are large and attractive, 3 to 4 inches long, pointed, medium dark green and contain large peas of the finest flavor.

The vines are usually about 2½ feet high, sturdy and bear large crops which are ready over a short period of time. We offer an exceptionally dependable early stock of this popular variety which we can recommend highly. See prices on next page.

Laxton's Progress

Large Podded—Medium Early

We offer a very superior stock of this excellent variety which produces heavy yields of large handsome pods with great regularity.

The vines grow 15 to 18 in. high and produce an abundance of large dark green pods about 4" in length. The peas ripen so uniformly that ordinarily two pickings will clean up the crop. These handsome, well filled pods always find a ready sale. See prices below.

Midseason Giant

(Giant Stride, Wyoming Wonder, etc.)

This variety comes on between the early sorts and the late varieties and has shown a remarkable ability to stand up and bear well in *hot dry weather*. The pods are large (4½ to 5 in. long) dark green and pointed. The yield is large, the pods being borne in great numbers on strong vigorous vines about 24 in. high. See prices on next page.

World's Record

Early Varieties

25 lbs. or more of one variety will be supplied at the 100 lb. rate. 1 bu. weighs 56 lbs.

THOMAS LAXTON. (3 ft.) Early	\$.30	\$1.80	\$3.30	\$10.65	\$19.00
Very early medium size blunt pods. An old standard and a most profitable market variety. Our stock is very fine, being true to name and heavy yielding.					
WORLD'S RECORD. (2 1/2 ft.) See preceding page.....	.30	1.90	3.45	11.20	20.00
<i>Medium and Late Varieties</i>					
ALDERMAN. (4 1/2 to 6 ft.) Dark Podded30	1.80	3.30	10.65	19.00
Larger pods and better yielder than the old Telephone. This is the best pea in the Telephone class. Pods are 5 to 6 in. long and of a deep green color. Our stock of Alderman is very superior.					
DWARF ALDERMAN. (2 ft.) Large Pods30	1.90	3.45	11.20	20.00
Large dark green pointed pods (4 1/2 to 5 in.) ready same time as Alderman. Vines sturdy and produce immense crops.					
LINCOLN. (2 1/2 ft.) Finest Quality30	1.90	3.45	11.20	20.00
Long narrow pods completely filled with 8 to 9 peas of highest quality. Produces immense crops which are very easily picked. A few days earlier than Alderman.					
MIDSEASON GIANT. (2 ft.) See preceding page.....	.30	1.90	3.45	11.20	20.00
ROGERS GILBO. (24 in.).....	.35	2.05	3.75
One of the best of the Midseason group. Produces heavy yields of long attractive pods, 4 1/2 to 5 in., dark green, pointed and well filled. <i>Crop very short.</i>					

PARSLEY

An ounce of seed will sow about 200 feet of row.

Paramount—The Outstanding Parsley

This is the finest and most uniformly curled strain of parsley we have ever seen. It is slightly more dwarf and slower growing than Champion. The leaves are all finely curled, of a rich deep green and with stems of good length. There are no flat leaves. Altogether this is a superb variety both for outdoor growing and forcing and we recommend it highly. See prices below.

	Oz.	1/4 lb.	lb.	10 lb.
CHAMPION, or Triple Moss Curled.....	\$.15	\$.35	\$1.10	\$10.00
This is a very superior strain. Although not quite as finely curled as Paramount, it is an early, rapid growing stock which will produce an abundance of fine parsley and give satisfaction wherever used.				
PARAMOUNT. Finest Curled. See above.....	.15	.35	1.10	10.00
PERFECTION. Early. Extra Fine Curled.....	.15	.40	1.25	11.50
An excellent variety which grows more vigorously and rapidly than Paramount and has stems a little longer. The leaves are beautifully cut and curled, and uniform dark green in color.				
Plain, large flat leaves, not curled. Used for flavoring.....	.15	.35	.90	8.00

Parsley for Roots

HAMBURG (Heimisher). Long or Parsnip Rooted. Selected Stock..	.15	.35	1.00	9.00
The roots are up to 8 in. long, parsnip-shaped, smooth and white. We have a very fine stock of this variety, which produces long, straight, thick roots.				

PARSNIPS

An ounce will sow 150 feet of row. 2 1/2 to 3 lbs. per acre.

Harris' Model

The Whitest Parsnips

These are smooth, snow white, hollow crown parsnips, with a minimum of side roots or prongs. They are of good length, but not too long and their smoothness is quite remarkable, giving the roots a very attractive appearance so that they usually sell for top prices.

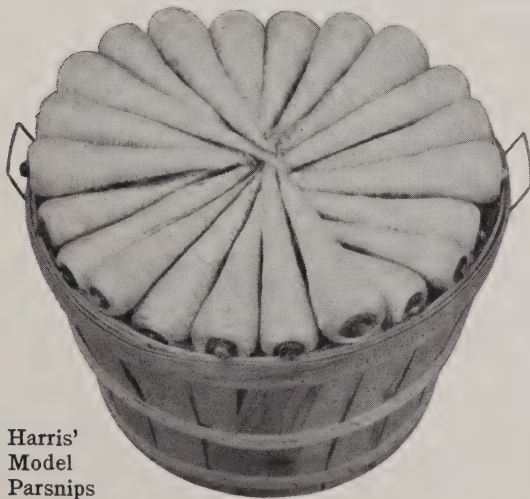

There is no better parsnip than "Harris' Model." Seed of our own growing from carefully selected transplanted roots.

Oz. 20c; 1/4 lb. 50c; lb. \$1.50; 10 lbs. \$14.00; 100 lbs. \$130.00.

Long Hollow Crown

Better than most stocks. Long smooth roots, not quite as uniform or white as Model.

Oz. 15c; 1/4 lb. 45c; lb. \$1.40; 10 lbs. \$13.00; 100 lbs. \$120.00.

Harris'
Model
Parsnips

PEPPERS

An ounce of seed will produce about 1000 plants.

Harris' Northern Grown Pepper Seed

If you want to make peppers a profitable crop here in the North, use Harris' Northern Grown Pepper Seed. We have specialized for over twenty years in growing peppers on our farm. Years ago we found out that the varieties which are usually grown in the long seasons and warmer climates farther south did not ripen enough fruit to make peppers profitable in the North. So we developed a number of *early, heavy bearing varieties*, which are suited to our conditions and will produce an abundance of ripe fruit wherever the seasons are short.

Harris' "King of the North" Peppers

One of our customers writes:

"Had wonderful luck with King of the North pepper. Some were six inches long. Plenty of ripe ones. Unusual on Maine coast where temperatures run below those in interior Maine." E. W. Vannah, East Boothbay, Maine.

Harris' Improved Squash Pepper

This pepper replaces the old type known as Squash, Cheese, Sunnybrook, etc.

It is so early and prolific that it produces three times as many peppers as any other "Squash or Cheese" pepper which we have seen. This early character and high yield make it a profitable kind to grow even here in the north. The fruit is the true "Squash" shape, with very thick mild, sweet flesh. These peppers are also known as "Pimientos" and are used for canning whole in some sections. Seed of our own growing. See prices on next page.

California Wonder

Large Fruit—Heavy Yielder

Ours is a remarkably superior stock of this fine pepper, which is so widely grown by market gardeners in all sections. The plants are of strong sturdy character and very prolific, bearing large crops of fine large peppers. The peppers are of the true California Wonder type, smooth and heavy, having very thick flesh. We are sure you will like this stock. See prices on next page.

Hot Portugal—Large and Hot

If you want lots of large, long *hot* peppers, grow this kind. The fruit is long, pointed and quite smooth for a pepper of this type. They normally average six inches or over in length and are borne profusely on the sturdy plant. This pepper is bright red when ripe and in addition to its large size, is just as hot as the old Giant Cayenne. Seed grown by us on our own farms. See prices on next page.

HARRIS' PEPPER PLANTS

We specialize in growing fine, strong, well hardened, true to name pepper plants. See page 34.

Harris' King of the North

Extremely Large, Early and Prolific

Since we introduced this variety in 1934, it has earned a reputation of producing greater yields of large peppers here in the North than any variety grown.

The plants are medium size, branching and literally covered with the immense fruit. The size and shape of the peppers is well shown in the photograph to the left.

The flesh is firm, mild and sweet. Harris Northern grown seed of this variety is by far the best strain obtainable. See prices on next page.

Harris' Early Giant

The Earliest Large Pepper

Harris' Early Giant which we introduced a number of years ago is a very profitable large early variety to grow in the North.

It is a most dependable cropper producing an abundance of large peppers which are often 4½ in. long and 4 in. across and ripen only a week later than Harris' Earliest, the earliest pepper grown. To be sure of the true stock, get your Harris' Early Giant from us. Seed grown on our own farms. See prices on next page.

Harris' Wonder

Now better than ever!

Without sacrificing any of the earliness or heavy yields which have made this pepper the outstanding variety for the North, we have improved the size and uniformly fine shape by pure line selection. Our 1942 seed crop was even more uniform and prolific than ever before.

Harris' Wonder is a very smooth, thick fleshed California Wonder type which will give you not only enormous crops of green peppers but an abundance of ripe fruit before frost.

The peppers are large, chunky and beautiful dark green turning to rich red when ripe. They are very thick meated and the quality is excellent. A level bushel weighs over 30 lbs. See prices below.

Checking Special Lines of Harris' Wonder

We are constantly working to improve our strains.

NOTE: Half ounces of pepper seed supplied at $\frac{1}{2}$ the ounce price.

	Oz.	$\frac{1}{4}$ lb.	lb.
CALIFORNIA WONDER. Thick flesh. True Stock. See preceding page....	\$.55	\$1.60	\$5.50
GIANT CAYENNE. (Hot). True Stock.....	.55	1.60	5.50
HARRIS' EARLIEST. The Earliest Sweet Pepper.....	.50	1.50	5.00
Invaluable for the extreme northern sections where other peppers will not ripen. Small plants producing enormous yields of fruit, and earlier than any other kind. Seed of our own growing.			
HARRIS' EARLY GIANT. The Earliest Large Pepper. See preceding page.....	.50	1.50	5.00
HARRIS' IMPROVED SQUASH. See preceding page.....	.50	1.50	5.00
HARRIS' KING OF THE NORTH. See preceding page.....	.50	1.50	5.00
HARRIS' WONDER. Early—Thick Fleshed. See above.....	.50	1.50	5.00
HEIFER HORN. (Hot) Private Stock.....	.55	1.60	5.50
One of the largest and best hot peppers. This is a special market gardeners' stock.			
HOT PORTUGAL. Large Hot. See preceding page.....	.60	1.75	6.00
HUNGARIAN WAX. (Hot) Long Type.....	.60	1.75	6.00
The peppers are 4 to $4\frac{1}{2}$ in. long by $1\frac{1}{2}$ in. at the stem end and pointed. Waxy yellow when young, turning red when ripe. Very hot.			
Large Red Cherry. (Hot).....	.50	1.50	5.00
Fruit nearly round 1 to $1\frac{1}{2}$ in. in diameter. A heavy bearer but not as early as other hot varieties. Extremely hot.			
OSHKOSH. The Largest and Best Yellow Pepper.....	.60	1.75	6.00
Fruit grows upright. The flesh is thick and exceptionally sweet.			
Pimiento. See under "Harris' Improved Squash Pepper".....
We have discontinued this variety as they seldom bear well in the North.			
WORLDBEATER, EARLY STRAIN. (NEW). Large and Prolific.....	.60	1.75	6.00
This splendid new strain enables growers to get fine large Worldbeater peppers in Northern sections, as it ripens earlier than the regular stocks. The fruits are very large, long and thick fleshed; the vines are husky and remarkably prolific. A most uniform and attractive stock.			
WORLDBEATER. True Stock.....	.45	1.20	4.00
This is the same fine true stock which has given our customers so much satisfaction for many years. Will produce tremendous crops where the seasons are fairly long. The stock is very true, producing large uniform fruit of the finest type.			
WINDSOR "A." Early Thick Meated.....	.50	1.50	5.00
Originated at the Connecticut Experiment Station. A long type resembling Ruby King in shape but with <i>very thick flesh</i> . Very prolific and produces an abundance of ripe fruit early. Peppers about $2\frac{1}{2}$ in. at top and $4\frac{1}{2}$ to 5 in. long.			

PUMPKINS

An ounce of seed will plant 20 hills, about 3 lbs. to the acre.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
CONNECTICUT FIELD or Big Tom.....	\$.15	\$.25	\$.75	\$ 7.00
The standard large pumpkin. True stock.

ORANGE WINTER LUXURY.....	.15	.40	1.20	11.00
This improved strain has netted deep orange skin and orange yellow flesh. A very uniform stock.				
SMALL SUGAR or Pie Pumpkin.....	.15	.30	1.00	9.00
The most popular variety for market. Small round, deep orange and of excellent quality. Early and prolific.				

Cavalier Radish

RADISH

$\frac{1}{4}$ lb. of seed will sow about 300 ft. of row.

NOTE: Every package of Harris Seeds is marked with the germination test. To growers who are interested we will be glad to furnish germination figures of our radish seed before they buy their seed.

Early Scarlet Globe Long Island Strain

Because of the popularity of this excellent radish among the critical market growers on Long Island, we have called this fine stock of radish our "Long Island strain."

The bulbs of this medium topped strain are of a brilliant scarlet color and are firm and solid. In general the shape is more rounded than Cavalier.

We recommend this strain as a particularly fine stock for outdoors as well as for greenhouses and frame growing where Early Scarlet Globe has been used. See prices below.

Cavalier

Short Top Scarlet Globe

The short tops, brilliant deep scarlet color, beautiful shape and extreme uniformity, and ability to stand a long time make this the best forcing type we have ever seen. These radishes are firm and solid, of the true olive shape and unusually uniform for type. It is often possible to pull practically 100% of number one radishes. It is also especially good on muck soils.

Growers everywhere are most enthusiastic over it and many of them tell us that these radishes sell for the best prices even when the market is slow.

"We are very much satisfied with your seeds, and especially the Cavalier radish. I am getting throughout the season \$1.50 per bu. (10 doz.) Radishes. When at Grand Rapids one can get all the radishes one wants for 55-65c per bu. "Never had better or as good seeds, and from now on Harris Co. gets our order." T. H. Raternik, Ionia, Mich. July 15, 1942.

Icicle Radish (White)

Short-Topped Strain—Also Called Pearl Forcing

This is an ideal stock of Icicle Radish, both for forcing and outdoors and it can also be grown successfully on muck. It is so much superior to ordinary stocks of Icicle that there is no comparison. The radishes are uniformly smooth and clear white. The tops do not grow too long in the greenhouses or frames, but are long enough for bunching when grown outdoors.

We have had a crop of our regular stock grown and are glad to tell our customers that we have a good supply of this fine true short-topped strain of Icicle radish. See prices on next page.

25 lbs. or more of any one variety will be supplied at the 100 lb. rate.

	$\frac{1}{4}$ lb.	lb.	10 lb.	100 lb.
CAVALIER. Short Top Scarlet Globe. See above.....	\$.35	\$1.10	\$10.50	\$100.00
COMET. Long Standing.....	.35	1.10	10.50
We are pleased that we can again offer this fine round radish that stands longer than any other kind. The radishes are very attractive, round in shape with fine tap roots and brilliant scarlet in color. Highly recommended for outdoors and forcing.				
CRIMSON GIANT GLOBE.....	.30	.90	8.50
Large globe radish for outdoor sowing. Bulbs attain a large size and are firm and mild.				
EARLY SCARLET GLOBE. Special Strain.....	.35	1.10	10.50	100.00
True olive shaped radishes, bright red in color, early, even maturing and uniform for type. Tops are good for bunching. An excellent variety for both forcing and outdoors.				
EARLY SCARLET GLOBE. Long Island Strain. See above.....	.30	.90	8.50	80.00
Early Scarlet Globe.....	.25	.75	7.00	65.00
An excellent stock but not quite as good as our other strains.				
EARLIEST SCARLET WHITE-TIPPED. Forcing Strain.....	.30	1.00	9.50
The radishes are round, brilliant scarlet with white bottoms. This is the finest strain of white-tipped radish, having small tops and is superior both for forcing and outdoor growing.				
Giant White Stuttgart.....	.30	.85	8.00
Large late white.

Large late white radish.

Winter Radishes

Sow in August and store in moist sand for winter.

BLACK SPANISH TURNIP.....	.30	.85	8.00
---------------------------	-----	-----	------	------

Roots are round or turnip shaped and grow very uniform in shape and size.

Clear white flesh, skin deep black without white streaks.

RHUBARB or PIE PLANT

Myatt's Linnaeus. Early large stalks. This is a better strain of the common rhubarb so widely grown. 1 oz. of seed will sow about 100 ft. of row. $\frac{1}{4}$ lb. 60c; 1 lb. \$2.00; 10 lb. \$19.00.

MacDonald Rhubarb Roots

We have an exceptionally fine lot of roots of the famous MacDonald Rhubarb. This rhubarb is the most distinct improvement made in rhubarb in many years and is conceded to be the best rhubarb ever produced.

The plant is vigorous and strong, producing large tender stalks which are deep crimson in color. They make a very attractive bunch and when cooked the sauce is a beautiful deep pink and of excellent flavor. Market growers who have been fortunate enough to get these roots in the past find this rhubarb sells readily at the highest prices.

We have not succeeded in producing this variety from seed.

Roots only—Strong divisions. 12 for \$2.50 Transportation paid. Not paid, 100 \$10.00; 1000 \$85.00. (Weight 1 $\frac{1}{2}$ lbs. each.)

SORREL

One ounce of seed will sow about 250 feet of row.

Write for Prices on Larger Quantities. Seed Treating Chart on Request.

For All Vegetable and Flower Seeds

SEMESAN. We have found this material most reliable to prevent damping off of seedlings. Used either as liquid for treating soil or dust disinfectant for seeds. 1 oz. treats 15 to 30 lbs. of seeds.

$\frac{1}{2}$ oz. 10c; 2 oz. 40c; 1 lb. \$2.50; 5 lbs. \$11.40. Not Prepaid.

For Field Corn and Sweet Corn

SEMESAN Jr. A cheap and effective dry dust disinfectant for both field or sweet corn. Prevents corn from rotting in the ground. 1 $\frac{1}{2}$ oz. treats 1 bu. of seed.

1 $\frac{1}{2}$ oz. 15c; 12 oz. 60c; 6 $\frac{1}{4}$ lbs. \$3.75. Not Prepaid.

For Wheat, Oats, and all Grain

CERESAN. New Improved. Effective dust for control of covered smut on wheat, oats and barley. $\frac{1}{2}$ oz. treats 1 bu. of seed.

4 oz. 30c; 1 lb. 80c; 4 lbs. \$2.70. Not Prepaid.

For All Seed Potatoes

SEMESAN BEL. For seed potatoes. One pound New Improved Semesan Bel treats 50 to 60 bu. of cut potatoes. For control of Rhizoctonia and seed-born Scab.

2 oz. 30c; 1 lb. \$1.65; 5 lbs. \$7.15. Not Prepaid.

SPINACH

Sow about 12 to 20 lbs. of seed per acre in rows.

Special Summer Savoy

Special Summer Savoy

An Extra Selected

Long Standing Bloomsdale

We highly recommend this remarkable strain of Long Standing Bloomsdale type, and we believe it is the best strain obtainable. Every plant is of the true type with large beautifully crumpled or "Savoyed" leaves; the color is a very attractive deep green and the spinach stands a long time without bolting to seed. Growers find that the yield per acre is consistently heavy.

This is the best kind for spring sowing and is also used for late fall sowing for spring crop as it is very hardy. We urge our customers to plant this extra fine stock which has been so satisfactory for many years. See prices below.

25 lbs. or more of any one variety supplied at 100 lb. rate.

	lb.	10 lb.	100 lb.
BLIGHT RESISTANT SAVOY. For Fall Crop. See below.....	\$.65	\$6.00	\$55.00
KING OF DENMARK(Crop failed)			
LONG STANDING BLOOMSDALE (For Spring sowing).....	.65	6.00	55.00
We have an exceptionally well bred strain. Large deep green, well crumpled leaves which produce enormous crops and stand a long time without bolting to seed. We recommend this stock.			
OLD DOMINION. For Fall Crop.70	6.50	60.00
Very popular for spring sowing in places where blight affects spinach and also for early fall sowing as it is <i>blight resistant</i> and will stand longer without going to seed than Blight Resistant Savoy. The leaves are large, dark green, well blistered or "Savoyed," producing large crops which stand up well when shipped.			
SPECIAL SUMMER SAVOY. See above.....	.65	6.00	55.00
VIKING. Large Leaved—Long Standing. See below.....	.75	7.00	65.00

Viking

Early—Large Leaved—Long Standing

This new spinach has proved to be a most excellent kind for spring sowing as it grows very rapidly and gets to cutting size early. It continues to grow a long time and produce immense plants without going to seed. The habit of growth resembles the old Nobel Giant Leaved, which Viking has now displaced. The leaves are large and broad, dark green in color and moderately well crumpled or blistered. Viking will produce extraordinary large crops of fine-looking spinach. See prices above.

Blight Resistant Savoy

Best for Fall Crops

We have an exceptionally good stock of this popular variety. It is the true Virginia Strain, practically 100% resistant to blight and can be depended on to produce large crops in the fall where other varieties blight and fail entirely. The type is excellent with dark green well crumpled leaves and the yields are very heavy.

Blight Resistant Savoy does not stand as well as some other kinds in the spring, although our strain will stand three to four days longer than most strains of this variety. See prices above.

Right: Manley B. Boyce of South Lincoln, Mass., harvesting Blight Resistant Savoy Spinach grown from our seed.

This crop yielded 1300 bu. per acre.

SUMMER SQUASH

$\frac{1}{4}$ lb. of seed will plant about 100 hills;
5 to 6 lbs. of seed per acre.

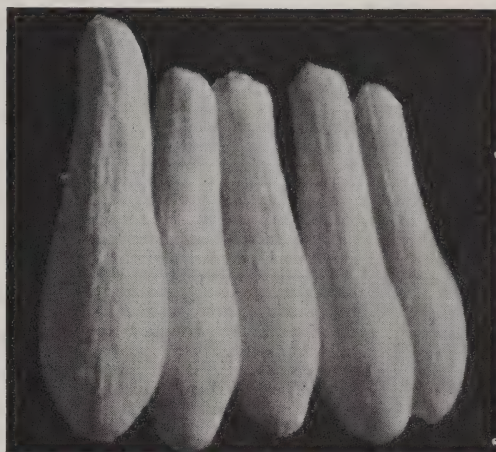

Yankee Hybrid (New)

Enormous Early Yields

On our farm both this year and last, Yankee Hybrid was not only several days earlier than the next best variety but the first picking averaged more than twice as many marketable fruit, and the total yield was greater.

The squash are of the finest type, extremely uniform and with straight thick necks. The skin is slightly roughened and of a glowing waxy yellow color that makes them very attractive. There is no green color even when very young.

We offer only the purest first generation Hybrid seed, difficult to produce, but essential to get the maximum earliness, vigor and uniformity. See prices below.

Yankee Hybrid

The earliest and most productive Summer Squash.

Harris' Improved Cocozelle—(New) Long Slender Straight Fruit

This is the long, slender, straight type of Cocozelle which critical squash growers have long been looking for. Developed and grown entirely by us on our own farm, this new strain will produce longer, more slender and more uniform fruits than the regular Italian Vegetable Marrow or Cocozelle, and makes a very fancy pack. *The squash are very even throughout the length and carry the desired dark green base color with stripes of lighter green.* Be sure to try this new kind. See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
Early Giant Crookneck.	\$.15	\$.45	\$1.50	\$12.50
Larger than the old Bush Crookneck and equally early. True strain.				
EARLY YELLOW PROLIFIC. See below20	.55	1.75	15.00
GIANT SUMMER STRAIGHTNECK. Bright Yellow.15	.45	1.50	12.50
This strain is the light yellow Straightneck which has been so popular because of the uniform straight fruit, with thick meaty necks. Some of the young fruits show a pale green color giving them an attractive tender appearance.				
GIANT SUMMER STRAIGHTNECK. Butter Yellow.15	.45	1.50	12.50
Without any trace of green even when young, this popular strain fills the demand for a large summer squash of clear butter yellow color. The fruits are smooth, bright and attractive. The vines are large and prolific.				
HARRIS' IMPROVED COCOZELLE. (New) See above.25	.70	2.25	20.00
ITALIAN VEGETABLE MARROW. (Cocozelle)20	.55	1.75	15.00
This is the same fine stock which we have sold for years. Produces mottled dark green fruit of good length. Bush vines.				
MAMMOTH WHITE BUSH SCALLOP. Also called "Cymling"15	.45	1.40	12.00
The popular type, producing large yields of thick creamy white, well scalloped fruit. Bush vines.				
YANKEE HYBRID. Remarkable New Early Straightneck. See above50	1.50	5.00	45.00
DARK GREEN ZUCCHINI. Special Long Strain.15	.45	1.50	12.50
This is a very superior strain with uniformly long dark green fruit, entirely without light grey fruit or light stripes. Exactly what is wanted.				

Early Yellow Prolific Summer Squash

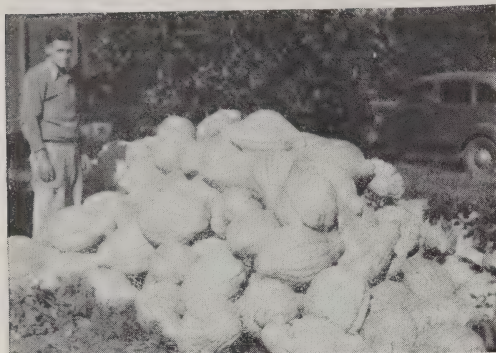

Early Yellow Prolific

This is now definitely established as one of the finest and most popular varieties. The fruit is not as large as the Giant Straightneck varieties, but they are borne in great profusion on the dwarf vines. These squash are very uniform for shape and size and are remarkable for their smooth skin and clear bright yellow color, having no trace of green even when very young.

We have grown a fine crop of seed on our own farm and can assure our customers that no better stock of this variety can be obtained. See prices above.

WINTER SQUASH

$\frac{1}{4}$ lb. of seed will plant 50 hills; 3 to 4 lbs. of seed per acre.

Harris' Blue Hubbard Squash
Part of our fine seed crop.

Blue Hubbard

Harris' Famous Selected Strain

This is the popular large, rugged strain that produces big yields of the finest squash, bringing top prices. It is the result of years of careful breeding and is considered to be the finest, purest stock grown.

Harris' Blue Hubbard can be relied on to produce immense yields of large well shaped squash. (See photograph) The seed we sell is all of our own growing and cannot be obtained elsewhere.

Although this was originally strictly a New England variety, the fine quality, enormous yields and excellent keeping quality have made this a most valuable kind for all markets. See prices below.

Quality—The Richest Small Market Squash

Quality squash cannot be excelled to meet the ever increasing demand for a small to medium size squash of superior quality at roadside stands and markets.

The squash are dark olive green in color, 7 to 9 inches in diameter, and of an attractive heart shape. The flesh is firm, thick and of the finest quality, being dry and sweet. Once they try it customers always come back for more of this kind.

It is our candid opinion that if you do not grow this kind you are missing a good thing. **Seed of our own growing.** See prices below.

Warren Squash—Improved Essex Hybrid (*New England Strain*)

This fine old New England squash has become popular in many sections which formerly would not use "orange or red" squash. Our stock of this type has proved more than satisfactory.

The squash are early, medium size, very uniform in shape and heavily warted. We have bred this strain with a well formed but not too prominent "button." The flesh is fine grained, extra thick and the color a beautiful deep orange red. **Seed of our own growing.** See prices below.

	Oz.	$\frac{1}{4}$ lb.	lb.	10 lb.
BLUE HUBBARD. Selected Strain. See above.25	\$.75	\$2.50	\$22.25
Boston Marrow15	.30	.90	8.50
Popular fall squash, deep orange color. Used principally for canning and pies.				
BUTTERCUP25	.75	2.50	22.25
This fine small squash has excellent quality and exceptionally thick sweet flesh and has become very popular for roadside stands and local markets. The shape is rather flat with a distinctive "button." Highly recommended where quality counts.				
DELICIOUS25	.65	2.00	17.50
Smaller than Hubbard, but of finer quality, deeper green shell with orange flesh. Dry and sweet. We have an excellent true stock.				
GOLDEN DELICIOUS20	.55	1.75	15.00
An excellent small orange squash for roadside and market. Superb quality.				
Golden Hubbard20	.55	1.75	15.00
The same shape as Hubbard but with deep orange yellow skin.				
HUBBARD—True20	.55	1.75	15.00
Dark green smooth skin, fruit of high quality. We have a fine true strain.				
IMPROVED WARTED HUBBARD. (Dark Green)20	.55	1.75	15.00
Larger, more warted, and darker green than the true Hubbard squash. An excellent stock that will produce large crops of the finest squash.				
QUALITY. See above.25	.75	2.50	22.25
ROYAL ACORN or Mammoth Table Queen. (New).20	.55	1.75	15.00
This new strain meets the growing demand for a squash shaped like the popular Table Queen but of larger size. The fruit measure about 6-7 in. long and 5 in. in diameter. Very uniform type, with attractive dark green color and fine quality. Try some Royal Acorn this year.				
TABLE QUEEN. Also called Acorn, Des Moines and Queen Ann. ..	.20	.50	1.65	14.00
The Individual Squash. Small dark green fruit 5 to 6 in. long $4\frac{1}{2}$ in. in diameter, deeply ribbed and very hard. We have a fine true stock of this popular variety.				
WARREN. Improved Essex Hybrid. See above.25	.75	2.50	22.25

TOMATOES

An ounce of seed will produce about 2000 plants.

Harris' New York State Certified Tomato Seed

For seven successive years we have offered New York State Certified Tomato seed of our own growing. This seed must meet the *highest* standard of purity and freedom from disease.

Most of the tomato seed sold today is a by-product from fruit which has been processed in canning factories for the juice. Our Certified Tomato Seed is all grown on our own farms *for seed only*. Our seed crops are grown 100% from hot water treated stock seed and the seed is all saved by the fermentation process; reducing seed borne diseases, such as early blight, to a minimum.

Rutgers

Harris' Northern Grown Strain

Rutgers tomato is now tremendously popular, and deservedly so, for it has proved excellent for both canning and market. It is famous for the large size and solid structure of its fruit, and its fine flavor and deep red color all over. The set of fruit is heavy making it one of the most prolific varieties.

Our strain has been grown and selected here in the North for years and has proved to be the best stock obtainable.

N. Y. State Certified Seed of our own growing. See prices on next page.

Harvesting Rutgers Tomatoes on our Farm

Victor—The New Extra Early Tomato

At the time when the old extra early varieties have but one or two ripe fruits, Victor produces large clusters of beautiful tomatoes ripening all at once. With Victor you can market an abundance of fine smooth first class tomatoes even earlier than you could the older kinds and get top prices.

The tomatoes are of good size, smooth and solid. Having a characteristic light color when green, they turn quickly to a brilliant scarlet color all over. There are no green spots on Victor.

The vine is a sturdy determinate type, that can be planted close together (2 x 3 ft. is recommended) and thus have more early fruit per acre. If you want extra early tomatoes, grow Victor.

N. Y. State Certified Seed of our own growing. See prices on next page.

Pritchard's Scarlet Topper—Also Called "Pritchard"

Because of its fine quality and beautiful appearance, this tomato has become one of the most popular market varieties. Starting with stock seed sent us by the United States Department of Agriculture, we have been growing and selecting the seed here in the North in order to maintain the size, vigor and earliness of this variety.

This is a very heavy bearer. The fruit is medium early, ripening right after Bonny Best. The flesh is very solid with few seed cavities and a fine red color all through. It is quite free from cracking. The quality is extra fine, being mild and without acidity.

N. Y. State Certified Seed of our own growing. See prices on next page.

**John Baer
Tomatoes**
*Part of a cluster of
fruit from our seed
fields.*

John Baer—Improved Strain **The Best Tomato in Its Class**

This is the **Geneva** strain of John Baer and will produce larger fruit and more tons of fine tomatoes to the acre than any strain we have ever seen.

The fruit is unusually large for this variety. It is very smooth and deep red throughout, coloring right up to the stem. The vines are vigorous and healthy and produce heavy crops.

We regard this Improved John Baer as one of the best medium early tomatoes, and can recommend it most highly both for market and canning.

N. Y. State Certified Seed of our own growing. See prices on next page.

Marglobe

Pan American

An excellent new main crop variety

Developed by the United States Department of Agriculture as a Marglobe type with *complete resistance to fusarium wilt*, this fine new variety proved highly promising this past year. The fruit carry the fine deep globe shape of Marglobe, and are so very uniform that we found practically no small tomatoes on the vines even late in the season. They are of fine quality, bright scarlet in color and ripen evenly to the stem. The flesh is solid, meaty and exceptionally firm.

Pan American is a main crop variety, ripening with us at about the same season as Marglobe and Rutgers. The large robust plants carry enormous yields of fine fruit, which holds up extremely well late in the season. Be sure to try some Pan American this year.

N. Y. State Certified Seed of our own growing. See prices below.

Marglobe Tomato—Blight Resistant

The fruit is large, globe shaped, perfectly smooth, deep red, very solid and firm. Widely grown for market and canning, this is also a standard variety for green pack, as it grows with very little stem crack and ripens well in storage. The vines are vigorous and healthy and do not blight, remaining green until frost, so the late fruit is as good as the first to ripen.

This is our own strain which we have grown on our farms for many years and carefully selected for yield and uniformity of color, size and shape of fruit.

N. Y. State Certified Seed of our own growing. See prices below.

Our stock is famous for extremely early, extra smooth fine colored fruit, and no better strain can be obtained.			
EARLY DETROIT. The Best Early Pink Tomato50	1.35	4.50
A very fine pink variety with smooth, evenly colored fruit of good size.			
GOLDEN GLOBE60	1.75	6.00
Deep orange yellow, true globe. Large thick meaty and prolific.			
ITALIAN RED PEAR. Pomo d'oro a Pero. (N.Y. Certified Seed) . . Pkt. 10c	.50	1.50	5.00
Three to four times as large as ordinary Red Pear. Clusters of 4 to 7 fruit with pleasant distinct flavor. Used largely for Tomato "paste" and canning "Italian Style."			
JOHN BAER. Improved Strain. (N.Y. Certified Seed)			
See preceding page 5 lbs. \$21.00	.50	1.45	4.75
MARGLOBE. Blight Resistant. (N.Y. Certified Seed) See above 5 lbs. \$25.00	.55	1.60	5.50
PAN AMERICAN. (New) Resistant Main Crop Type. (N.Y. Certified Seed)			
See above75	2.35	8.00
PONDEROSA. Largest Pink Kind.60	1.90	6.50
Magnificent, heavy, solid fruit, often weighing 2 lbs. or more; light pink; medium late; does not color very well and is somewhat irregular.			
PRITCHARD'S SCARLET TOPPER. (N.Y. Certified Seed)			
See preceding page 5 lbs. \$27.50	.60	1.75	6.00
RUTGERS. (N.Y. Certified Seed) See preceding page 5 lbs. \$27.50	.60	1.75	6.00
STOKESDALE. (N.Y. Certified Seed)60	1.75	6.00
An excellent medium early tomato, in season of John Baer and adapted for market, shipping and canning. The fruit is medium size, deep globe shape, very solid and of fine quality. Ripens evenly to a good scarlet color and the vines are very prolific. We offer New York State Certified seed grown on our own farms, and our strain is the best obtainable.			
VICTOR. (New) Outstanding Extra Early. (N.Y. Certified Seed) See preceding page75	2.35	8.00

Selecting Comet Tomatoes on our Farm

HARRIS' TOMATO PLANTS

We specialize in growing fine, sturdy tomato plants, either large transplanted plants ready to set in the open ground, or seedlings which can be grown in frames for a few weeks before setting out.

See next page for prices and varieties.

TURNIPS

It requires 1 to 1½ lbs. of seed per acre in drills, or 2 to 2½ lbs. broadcast.

Purple Top White Globe Special Strain

This stock of Purple Top White Globe turnip continues to produce the smoothest, handsomest turnips we have ever seen. The turnips are a snowy white with bright purple tops and the shape is smooth and round. This strain is very uniform and all the turnips are of the finest type.

It costs no more to grow these fine turnips, and their attractive appearance makes them sell much better on the market. See prices below.

Purple Top
White Globe

	¼ lb.	1 lb.	10 lb.
EARLY PURPLE TOP MILAN.	\$.30	\$1.00	\$ 9.00
The earliest purple top turnip, very fine. Flat.			
EARLY WHITE MILAN. The Earliest Turnip.30	1.00	9.00
Very early, flat white turnip.			
GOLDEN BALL. The Smoothest Yellow Turnip.30	1.00	9.00
Round, smooth yellow. Much the best to grow where a yellow turnip is wanted.			
PURPLE TOP WHITE GLOBE. Special Strain. See above.....	.25	.75	7.00
SHOGGIN. The Best Foliage Variety.35	1.10	10.00
The best turnip for greens, very much superior to Seven Top. The turnips are white, flat and of fine quality. The tops are light green of good quality and grow in clusters.			

RUTA BAGAS or Swede Turnips Macomber—Finest Quality—White Flesh

This is a ruta бага which should be grown more extensively. It is the finest quality we know, being exceptionally mild and sweet. The roots are nearly round, smooth, white with green tops. The flesh is creamy white and very fine grained. Growers with discriminating customers quickly work up a fine trade with this outstanding variety. See prices below.

	¼ lb.	1 lb.	10 lb.
MACOMBER. Finest Quality. See above.....	\$.60	\$2.00	\$19.00
IMPROVED LONG ISLAND. Purple-top.50	1.50	14.00
A superior strain of ruta бага. The roots are large globe shape, smooth and without too much neck. The flesh is yellow and of fine quality. Heavy yielder			

Comet Tomato For Greenhouse and Trellis Growing

Our stock is used regularly by some of the largest and best growers of greenhouse and trellis tomatoes, where a medium size fruit is wanted. We are pleased to offer **N. Y. State Certified Seed** of this fine strain of **Comet Tomato**. The seed is saved only from the best fruit on trellis grown plants and has been found superior for both greenhouse use and growing outside on supports.

Pkt. 20c; ½ oz. 50c; ¼ oz. 90c; ½ oz. \$1.65;
oz. \$3.00; ¼ lb. \$10.00.

Small Fruited Tomatoes

Popular to use in pickles, salads and preserves.
Varieties: Red Cherry, Red Pear, Red Plum, Red Currant, Yellow Cherry, Yellow Pear, Yellow Plum, and Ground Cherry (Husk).

Pkt. 10c; ½ oz. 35c; oz. 60c; ¼ lb. \$1.90.
Any three Pkts. 25c. Any three ½ oz. 90c.

VEGETABLE PLANTS AND ROOTS

Orders for plants will be entered at any time. The plants will be sent as near specific dates as possible if so ordered, otherwise they will be sent when ready or when it is time to set them out.

For those who use vegetable plants in large quantities *if ordered before Feb. 15th*, we can grow to your order at special prices. *Write for quotations on your requirements.*

PLEASE NOTE: Our plants are expertly and carefully packed so that they will reach you in good condition, but if they are delayed on the road or for any other reason, they arrive in poor shape, let us know at once and we will replace them. We cannot be responsible for the plants living after they are planted as this depends on how they are planted and the soil and weather conditions over which we have no control.

Except where noted, the plants are sent at the expense of the purchaser. If plants are wanted by parcel post an extra charge is made for postage as follows: To places in the 2nd zone (150 miles) 1c per lb., 3rd zone 2c per lb., 4th zone 4c per lb., 5th zone 6c per lb.

We do not ship plants C. O. D.

250 or more plants are furnished at the 500 rate; 750 or more at the 1000 rate. For prices on quantities less than listed here see our general catalogue.

Vegetable Plants

CABBAGE PLANTS. Early transplanted plants, ready April 15 to May 15. Well hardened in cold frames and will stand considerable frost. Golden Acre only. Weight 500-14 lbs., 1000-25 lbs. **Not prepaid 500 plants \$5.50, 1000 \$10.00.**

Not prepaid 100 plants \$7.00.

TOMATOES. Strong Transplanted Plants, well hardened, ready about May 15th. Varieties: Victor, John Baer, Bonny Best, Pritchard's Scarlet Topper, Rutgers, Marglobe, Golden Globe. Weight 500-18 lbs., 1000-30 lbs. **Not prepaid 500 plants \$7.50, 1000 \$14.00.**

TOMATOES. Untransplanted Plants. Varieties: Victor, John Baer, Bonny Best, Pritchard's Scarlet Topper, Rutgers, Marglobe. (See also below.)* Sturdy plants, grown especially for seedlings from seed sown very thinly. They should be set in frames and allowed to grow for two weeks or more before setting in the field. Strong seedlings 3 to 4 in. high. Ready April 10 to May 15. 500 plants \$2.50, 1000 \$4.50 transportation paid.

TOMATOES. Potted Plants. Grown and shipped in No. 2½ "Fertile Pots." Varieties: Victor, John Baer, Bonny Best, Pritchard's Scarlet Topper and Rutgers. Weight 100 plants 70 lbs.

Not prepaid 100 plants \$6.00.

*Note: For growers who use tomato and pepper seedlings in large quantities (5000 or more) we can grow any variety for you if ordered before Feb. 15th. Write for prices.

"Your plants were the best I ever bought at any price; much nicer than one could expect. I am more than satisfied with all seeds and plants."

L. D. Phelps, Corinth, N. Y., June 15, 1942.

ROOTS, ETC.

ASPARAGUS. *Mary Washington.* The quality of the roots is of utmost importance in starting an asparagus bed. When you buy from us you can be sure of getting roots of the true strain, freshly dug, carefully sorted and superior in every way.

1 yr. roots (weight 500-35 lbs., 1000-70 lbs.) **Not prepaid 500 roots \$5.00, 1000 \$9.00.**

2 yr. roots (weight 500-50 lbs., 1000-100 lbs.) **Not prepaid 500 roots \$7.50, 1000 \$14.00.**

HORSE RADISH. *New Bohemian.* ("Maliner-Kren.") Write for special price for large lots.
500 sets \$5.00, 1000 \$9.00 transportation paid.

RHUBARB ROOTS. *MacDonald.* Sturdy root divisions. See page 27. (Weight 1½ lbs. each.)
12 roots \$2.50 transportation paid. **Not prepaid 100 roots \$10.00, 1000 \$85.00.**

CHIVES. Good size clumps. Weight 100 clumps 35 lbs. **Not prepaid 100 clumps \$6.00.**

SAGE. *Holt's Mammoth Broad Leaf.* True perennial, does not go to seed. Produces heavy yield of leaves. Weight 100 plants 35 lbs. **Not prepaid 100 plants \$12.00.**

SPEARMINT. Green stemmed upland variety. Mild flavored. Weight 100 plants 35 lbs.
Not prepaid 100 roots \$10.00.

STRAWBERRIES, RASPBERRIES, ETC.

The plants listed below are sent by express or freight at the purchaser's expense. If wanted by parcel post, sufficient postage to cover cost of mailing must be enclosed with the order.

Please note that we do not ship plants C. O. D.

For complete descriptions of varieties, please see our general catalogue.

250 or more plants are furnished at the 500 rate; 750 or more at the 1000 rate. For prices of quantities less than listed here, see our general catalogue.

Strawberries

Strong fresh dug plants, guaranteed to reach the purchaser in good condition.

Weight of strawberry plants 500-35 lbs., 1000-65 lbs.

	NOT PREPAID	
	500	1000
CATSKILL. (New) Midseason.	\$5.00	\$ 9.00
The best variety to prolong the season, as it ripens medium early and lasts a long time. Berries firm, bright red and of very good quality. (Perfect.)		
FAIRFAX.	5.00	9.00
One of the best varieties we have ever seen. The berries are early, large, firm and of attractive dark red color and extra fine quality. The yield is excellent. (Perfect.)		
PREMIER.	4.50	8.00
The most widely grown strawberry in the East. On account of its fine appearance, earliness and large size this is a most profitable kind to grow for market. (Perfect.)		

Fall or Everbearing Strawberries

GEM. The best Fall Bearing Variety.	6.50	12.00
This variety is recognized as outstanding among the "everbearing" kinds.		

"The Gem strawberry plants I bought from you are the finest I have ever seen. Every one lived and they are growing wonderfully."
Mrs. Stephen Church, New Bedford, July 6, 1942.

Raspberries

These plants are not only the best varieties grown today, but we have carefully selected strong sturdy plants, from true disease free fields.

Weight: Red varieties 20 lbs. per 100, 125 lbs. per 1000.

Purple and Black varieties, 35 lbs. per 100,
250 lbs. per 1000.

	NOT PREPAID		
	100	500	1000
COLUMBIAN. (Purple)	\$4.00	\$15.50	\$30.00
The best purple raspberry and one of the most profitable kinds to grow. Very large berries, fairly solid with attractive purplish red color.			
INDIAN SUMMER. (Red) Fall Bearing.	4.50	18.00	35.00
This berry produces a second crop in early fall and is valuable for this reason.			
LATHAM. (Red) Mosaic resistant.	3.50	13.00	25.00
One of the best red raspberries and a standard commercial sort.			
MORRISON. (NEW) (Black)	6.00	25.00	45.00
New large and delicious black cap variety, ripening just after Shuttleworth. The large size, attractive appearance and high quality bring premium prices on the market.			
NEWBURGH. (Red) Mosaic resistant.	4.00	14.50	28.00
Berries are large, firm, do not crumble and of superb quality.			
SHUTTLEWORTH. (Black) Mosaic resistant.	4.50	18.00	35.00
Large black berries of superior quality.			
TAYLOR. (New) (Red)	3.50	13.00	25.00
An outstanding new kind. Very large, long and somewhat conical berries, of attractive bright red color, sweet and of fine flavor. Midseason, hardy and productive.			

Blackberries

These plants are "Extra Selected" and greatly superior to most plants sold. Weight 100-20 lbs., 500-70 lbs., 1000-120 lbs.

	NOT PREPAID		
	100	500	1000
BLOWERS	\$3.50	\$13.00	\$25.00
Delicious fruit ripening over a long period of time, which produces very large yields.			
ELDORADO	3.50	13.00	25.00
High quality and very productive. The leading commercial blackberry.			

Grapes

The varieties here have been selected as the best in their respective groups and will prove most satisfactory. We sell only strong native grown, true to name and acclimated vines. Weight 25-18 lbs., 100-60 lbs.

	NOT PREPAID	
	25	100
CACO. (Red) 2 yr.	\$5.00	\$18.00
A cross between Concord and Catawba. Large berries and early.		
CONCORD. (Black) 2 yr.	3.00	10.00
The standard black grape.		
FREDONIA. (Black) 2 yr.	4.75	16.00
Very early ripening two weeks before Concord. Fruit large, handsome and of excellent quality. Vigorous and productive.		
NIAGARA. (White) 2 yr.	3.75	12.00
The standard white grape.		
PORTLAND. (White) 2 yr.	5.00	18.00
The earliest white grape, and one of the finest for quality, vigor and yield.		
VAN BUREN. (New) (Black) Strong 1 yr. vines.	20.00
The earliest black grape. Ripens three weeks earlier than Concord and makes fine bunches of the best quality berries. We highly recommend this new variety.		
WORDEN. (Black) 2 yr.	3.50	12.00
Earlier than Concord. Large black berries of fine quality.		

Certified Seed Potatoes

About Shipping. The potatoes are shipped in sacks holding 100 pounds. We can usually ship safely by the 25th of March, but not before, except to the Southern States.

Prices Subject to Change. The prices of potatoes are subject to market changes and to our acceptance on receipt of order. We will be pleased to quote lowest prices by letter. Please state the kinds and amounts you are interested in.

Note: We now ship potatoes in sacks containing 100 pounds.
(Bu. 60 lbs., Sack 100 lbs.)

	NOT PREPAID	
	Single Bu.	Sack 100 lb.
CHIPPEWA. Early. Certified Seed	\$ 3.50	\$5.25
A few days later than Cobbler, but yields more No. 1 tubers. A white potato of fine shape with shallow eyes. Popular on muck and upland.		
GOLDEN RURAL or RURAL RUSSET. Certified Seed	3.00	4.50
One of the very best potatoes, almost blight-proof, vines very strong and vigorous and produce immense yields of handsome round, white potatoes. We think larger crops can be raised with this variety than any other kind.		
GREEN MOUNTAIN. Certified Seed	3.00	4.50
Medium early white potato of finest quality. Does best and yields heaviest crops on lighter soils. Excellent for New York and New England.		
IRISH COBBLER. Early. Certified Seed	3.50	5.25
The most popular round white early potato.		
KATAHDIN. Certified Seed	3.00	4.50
A handsome shallow-eyed white skin potato, ripening a little later than Green Mountain. Uniform in shape and of excellent quality. Does best on muck or light upland soil.		

HARRIS' FARM AND FIELD SEEDS

PLEASE NOTE. The prices here quoted are for cash with order and for seeds delivered f.o.b. Coldwater, N. Y. Purchaser pays transportation on all farm, field and grass seed. We do not charge for bags.

All prices of the following farm and field and grass seeds quoted on these pages are subject to change without notice and to our stocks being unsold. *Let us know your requirements and we will be pleased to quote you lowest prices at any time.*

We handle farm and field seeds of the highest quality only. See our General Catalogue for full descriptions.

To Florists of established credit, and those who furnish us with satisfactory references we allow the following *time payment except on field and grass seed*:

Bills for seeds, plants, etc. shipped after December 1st are due and payable net June 1st.

Bills for goods shipped after June 1st are due net December 1st.

HARRIS' ASTERS

Harris' Early Dawn Asters

A new class of extra early Asters of our own growing. They bloom so early that, with us, they are not affected by the tarnish plant bug. We grow them from seed without transplanting. Many prefer them to Queen of the Market.

W1254—Lavender.....	Lg.		
W1253—Rose.....	Pkt. ¼ Oz.	Oz.	
W1251—White.....	\$.20	\$.45	\$1.50
W1250—Variety Mixture.....	.15	.40	1.25

Harris' Early Dawn Aster

New Wilt-Resistant Asters

You, as a commercial grower cannot afford to gamble unnecessarily. Sow only "Wilt-Resistant Asters" and eliminate the risk of "wilt" or "stem rot." Although they are not 100% wilt-proof, they are so resistant to wilt they will thrive in infected soil where others would not grow.

American Branching Asters

The leading mid-season variety for all purposes.

W1604—Azure Blue.....	Lg.		
W1606—Crimson.....	Pkt. ¼ Oz.	Oz.	
W1602—Flesh Pink.....	\$.20	\$.45	\$1.40
W1607—Peach Blossom.....			
W1605—Purple.....			
W1603—Rose.....			
W1601—White.....			

W1600—Variety Mixture. An excellent mixture especially made by us, using fresh, new crop seed of all the varieties in proper proportions for a good balance of color. Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.

New Early Giant Asters

A much earlier, and wilt-resistant strain of the immense California Giant Asters.

W1824—Light Blue.....	Lg.		
W1823—Peach Blossom.....	Pkt. ¼ Oz.	Oz.	
W1822—Rose Marie. Bright rose...	\$.30	\$.75	\$2.50

Peerless Pink Aster

W1066—This is still the most popular light pink Aster. Large double flowers on vigorous plants. Lg. Pkt. 20c; ¼ Oz. 45c; Oz. \$1.40.

Heart of France Aster

W1078—The most popular "red" Aster and still a favorite for the gardens. There is no other Aster to take its place. Lg. Pkt. 30c; ¼ Oz. 70c; Oz. \$2.20.

Crego Asters

Also called "Ostrich Feather" Asters. Large flowers with long twisted petals. We have selected the five best colors.

W1402—Shell Pint.....	Lg.		
W1404—Azure Blue.....	Pkt. ¼ Oz.	Oz.	
W1405—Purple.....	\$.20	\$.45	\$1.40
W1403—Deep Rose.....			
W1401—White.....			

W1400—Variety Mixture. Our own specially made mixture of fresh seed of the above kinds. Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.

Royal Asters

Same form as American Branching but several days earlier.

W1301—White.....	Lg.		
W1303—Rose.....	Pkt. ¼ Oz.	Oz.	
W1304—Lavender.....	\$.20	\$.45	\$1.40
W1305—Purple.....			

W1300—Variety Mixture. A properly proportioned mixture of our own. Lg. Pkt. 15c; ¼ Oz. 40c; Oz. \$1.20.

Harris' 8-Best Mixture

W1500—Our own special mixture made from equal quantities of the following eight best Wilt-Resistant Asters:

Crego Shell Pink	Early Giant Light Blue
Crego Deep Rose	Early Giant Peach Blossom
Peerless Pink	Am. Branching Purple
Heart of France	Am. Branching White
Lg. Pkt. 15c; ¼ Oz. 35c; Oz. \$1.30; ¼ Lb. \$4.00.	

HARRIS' ASTERS—Continued

Although the following Asters are not listed as "Wilt-Resistant" they are particularly good growers and should not be troubled by wilt unless grown in badly infected soil.

California Giant Asters

A new strain of remarkable Asters on immense robust plants. The flowers have long twisted petals and are colossal in size.

W1815—Dark Purple.....	Lg.		
W1812—Deep Rose.....	Pkt. ¼ Oz.	Oz.	
W1814—Light Blue.....			
W1813—Peach Blossom.....	\$.25	\$.60	\$2.00
W1816—Shell Pink.....			
W1811—White.....			
W1810—Variety Mixture. A splendid well balanced mixture of our own making. Lg. Pkt. 20c; ¼ Oz. 55c; Oz. \$1.80.			

New Daisy Asters

W1830—California Giant Single, Mixed Colors. Immense single flowers with long graceful petals. Plants are vigorous and are very resistant to disease. Lg. Pkt. 15c; ¼ Oz. 20c; Oz. 50c.

Sunshine Asters

W1010—New California Sunshine, Mixed Colors. A better mixture of tall growing Asters with large single flowers, many with quilled centers. This is an extra special mixture we make by using fresh, new crop seed. Lg. Pkt. 30c; ¼ Oz. 85c; Oz. \$3.00.

W1000—Choice Mixture of Tall Varieties. ¼ Oz. 30c; Oz. 90c; ¼ Lb. \$2.70.

"Again this year, Asters grown from your seeds were simply grand. I mean large flower heads, long stems, and a germination of at least 80%." W. R. Gerjard, Beverly Hills, Penna.

Harris' Lilliput Asters

Upright and compact growing plants with small double flowers that last a long time after being cut. Usually sowed early outdoors in drill rows and the entire plant cut. Ideal for low-priced bouquets.

W1100—MIXED COLORS. A special mixture of our own growing containing many different colors. Lg. Pkt. 20c; ¼ Oz. 40c; Oz. \$1.25.			
W1101—White.....			
W1102—Rose.....	¼ Oz.	Oz.	
W1103—Scarlet.....			
W1104—Light Blue.....			
W1105—Dark Violet.....			
W1106—Crimson.....			
		\$.60	\$1.80

Pompon Asters are ideal for cutting

Ageratum

This last summer we tried most all of the different American grown varieties and selected these four as the best.

	Lg. Pkt.	¼ Oz.	Oz.	
W2012—MIDGET BLUE. A new very dwarf only 5 to 6 inches tall with mid-blue flowers ½ Oz. \$1.00				
		\$.45	\$1.70	\$5.00
W2013—BLUE BEDDER. A new dwarf, large-flowered variety that showed up especially well with us. We believe it to be the best dwarf variety. ¼ Oz. 75c		.35	1.30	4.00
W2014—BLUE BALL. A large flowered, light blue dwarf about 6 to 8 inches tall. ¼ Oz. 45c		.25	.70	1.40
W2015—SWANLEY BLUE. Long-stemmed light blue about 15 to 18 inches tall. Often used for cutting		.15	.30	.90

Carnation

Giant Double Chabaud

This has always been a good variety to sow for plant sales. Sowed indoors very early and grown cool the plants will find a ready sale.

	Lg. Pkt.	¼ Oz.	Oz.
W2290—Mixed Colors. An extra good strain of large flowers.....	\$.20	\$.60	\$2.00

Coleus

For the last few years we have been developing a new strain of large-leaved Coleus seed. We now have Coleus seed of our own growing which we are proud to introduce.

W2511—HARRIS' EXTRA FANCY MIXTURE. The leaves are uniformly large and in the brightest color combinations. The plants tend to stay low and not run up to flower until very late. We feel confident this is the best strain of seed you can possibly buy. Pkt. 25c; ¼ Oz. \$1.50; ½ Oz. \$5.00; ¾ Oz. \$9.50.

W2510—Rainbow Mixture. This formerly was the best strain we could procure and is still considered very good. ¼ Oz. 40c; ½ Oz. \$1.30; Oz. \$5.00.

Dahlia

Dwarf Dahlias are rapidly increasing in popularity both for plant sales and cut-flowers.

W2605—VOSSBERG'S HYBRIDS. Here is a new single variety that should appeal to you. Bred by a florist for florists. Contains the colors you want and keeps longer in water. Popular on the New York flower market. 3 ft. tall... \$.30 \$.65 \$1.00

W2606—UNWIN'S DWARF HYBRIDS. A very good mixture of many types and colors in single and semi-double flowers with good stems for cutting... Oz. \$1.50 .20 .30 .50

Gypsophila

W2992—HARRIS' COVENT GARDEN. The largest flowered and decidedly the best. Oz. 30c; ¼ Lb. \$1.00; Lb. \$3.00.

Larkspur

The finest Larkspur for outdoor cutting is probably produced by sowing seed outdoors in the fall. We consider these the six best.

Giant Imperial

W3248—LOS ANGELES IMPROVED. Salmon rose
W3254—BLUE BELL. Mid blue
W3255—ADORABLE. Lilac lavender
W3256—WHITE KING. Large white
W3258—BLUE SPIRE. Deep violet blue
W3252—CARMINE KING. Rich, bright carmine
Any of the above colors: Lg. Pkt. 15c; ¼ Oz. 30c; Oz. 90c; ¼ Lb. \$2.50.
W3250—VARIETY MIXTURE. Our own mixture of the above named six best kinds. Lg. Pkt. 15c; ¼ Oz. 25c; Oz. 75c; ¼ Lb. \$2.00.

Lobelia

W3300—CRYSTAL PALACE COMPACTA. Pretty little blue flowered plants for edging or pots. Lg. Pkt. 25c; ¼ Oz. 60c; Oz. \$2.00.
W3301—CAMBRIDGE BLUE. Light green foliage, light blue flowers. ¼ Oz. 50c; ½ Oz. 75c.
W3302—BEDDING QUEEN. Very dwarf, medium dark foliage, large deep blue flowers with white eye. ½ Oz. 45c; ¼ Oz. 65c.

Morning Glory

Lg. Pkt. ¼ Oz. Oz.
W3475—HEAVENLY BLUE..... \$.15 \$.35 \$1.00
W3477—SCARLETT O'HARA. The All-America Gold Medal winner for 1939. Immense deep scarlet... .20 .45 1.50
W3474—PEARLY GATES. The new white-flowered All-America winner for 1942. The same growth and earliness as Heavenly Blue... .30 .75 2.50
W3478—Crimson Rambler. Free-flowering medium - sized, rapid climbing..... .25 .75
W3476—Moonflower (White)..... .20 .50
W3480—Mixed Colors..... .10 .25

Cup Flower

W3664—NIEREMBERGIA Purple Robe. One of the newer outstanding bedding plants. Bright lavender-blue flowers. 5 to 6 in. high. Lg. Pkt. 40c; ¼ Oz. \$1.50

Nicotiana

Lg. Pkt. ¼ Oz. Oz.
W3671—Affinis, White..... \$.15 \$.20 \$.50
W3670—Affinis, Mixed Colors..... .15 .20 .50

W3675—Suaveolens, Orange Blossom. A splendid new low-growing, white-flowered variety, excellent for plant trade. Lg. Pkt. 40c; ¼ Oz. \$1.25; ½ Oz. \$2.00.

Portulaca

Lg. Pkt. ¼ Oz. Oz.
W3870—DOUBLE, Mixed Colors... \$.25 \$.75 \$2.50
W3880—SINGLE, Mixed Colors... .65 2.00

Phlox

Drummondii Grandiflora (15 to 18 in. tall)
Lg. Pkt. ¼ Oz. Oz.
W3860—Mixed Colors..... \$.20 \$.65 \$2.00

Marigolds

EARLY DWARF MARIGOLDS

W3415—HARMONY HYBRIDS or Improved Dwarf French. New mixture of various shades and combinations all of Harmony type	Lg. Pkt. ¼ Oz. Oz.		
	\$.15	\$.35	\$1.00
W3414—YELLOW PYGMY. Small yellow double flowers on very compact dwarf plants. Excellent for early potted plants. Very uniform.	.15	.40	1.20
W3422—HARMONY. Still one of the most popular. Golden center with red guard petals.	.25	.75	
W3421—LITTLE GIANT. (Scotch Marigold or <i>Tagetes signata</i> .) An improved strain. Small single yellow flowers and finely cut foliage.	.15	.45	1.50
W3411—SPOTLIGHT. Bright yellow quilled center surrounded by mahogany red petals. Very bright	.15	.35	1.00
W3416—SPRY. Very early flowering double golden-yellow and red. Especially good for early pots.	.15	.45	1.50
W3417—SCARLET GLOW. Double flowers all red and mahogany. Same growth as Harmony.	.15	.45	1.50
W3419—MELODY. A double golden yellow of Harmony type. Uniformly 12 to 15 in. tall and early	.15	.40	1.20

MEDIUM TALL AND EARLY MARIGOLDS

W3403—VIKING. The earliest of all in this group. Medium-sized loose-petalled flowers in profusion. Mixed Colors.	Lg. Pkt. ¼ Oz. Oz.		
	\$.15	\$.45	\$1.50
W3412—LIMELIGHT. Very early, light yellow <i>Chrysanthemum</i> -flowered.	.15	.45	1.50
W3409—GOLDEN GLOW (Odorless). Excellent for cutting.	.15	.40	1.20
W3428—EARLY SUNSHINE. Golden yellow <i>Chrysanthemum</i> -flowered.	.15	.45	1.50
W3413—RED AND GOLD HYBRIDS. Very popular for both plant sales and cutting.	.30	1.50	5.00

Double African Marigold

TALL MARIGOLDS Carnation-flowered Marigolds

W3426—YELLOW SUPREME	Lg. Pkt. ¼ Oz. Oz.		
	\$.15	\$.35	\$1.00
W3427—GUINEA GOLD	.15	.35	1.00
W3423—BURPEE GOLD (Odorless)	.15	.35	1.00
W3424—GOLDEN SUPREME MIXTURE	.10	.25	.75

Double African Marigolds

W3404—ORANGE ALL-DOUBLE	Lg. Pkt. ¼ Oz. Oz.		
	\$.20	\$.55	\$1.75
W3405—LEMON ALL-DOUBLE	.20	.55	1.75
W3400—MIXED COLORS	.15	.45	1.50
W3407—SUNSET GIANTS, Mixed Colors. Mammoth double flowers	.15	.45	1.50

Pansies

New Swiss Giant Pansies

W3705—MAGNIFICENT MIXTURE. By actual tests every year on our farm, this strain of mammoth-flowered Pansies has proved to be the best. The color range includes the dark browns and reds as well as the bright shades, and is the choice of Pansy critics. Lg. Pkt. 40c; ⅛ Oz. \$1.00; ¼ Oz. \$1.75; Oz. \$6.00; ¼ Lb. \$20.00.			
W3703—MAPLE LEAF GIANTS, Mixed Colors. The largest flowers of all Pansies. Blue and yellow shades predominating on long stems. Lg. Pkt. 40c; ⅛ Oz. \$1.25; ¼ Oz. \$2.00; Oz. \$7.00.			

Viola

Our seed of this everblooming pansy-like strain is of unusually high germination.

W3761—White Perfection.	Lg. Pkt. ⅛ Oz. ¼ Oz.		
W3762—Chantreyland, Apricot.	\$.30	\$.75	\$1.25
W3763—Lutea Splendens, Yellow.			
W3764—Blue Perfection.			
W3760—Mixed Colors.	.25	.55	.95

A New Harris-Grown Pansy

W3700—EARLY MARKET MIXTURE (Harris Grown). Here is a new mixture of large-flowered Pansies in an unusually bright and pleasing range of colors. They start flowering very early and the plants remain low growing and very compact, with the flowers held up straight above the plant. It is our finest low-priced mixture and ideal to dig for baskets. Lg. Pkt. 35c; ⅛ Oz. 90c; ¼ Oz. \$1.50; Oz. \$5.00; ¼ Lb. \$17.00.			
---	--	--	--

Two New Harris Pansies

W3735—WHITE SWISS (Harris Grown). Larger pure creamy-white on very compact plants. In our field they continued to bloom all summer and the plants remained compact. White Pansy plants are in great demand. Lg. Pkt. 50c; ⅛ Oz. \$1.65; ¼ Oz. \$2.75.			
W3736—PORCELAIN BLUE (Harris Grown). A new color of unusual attractiveness. The color is a pale clear blue with a brighter blue blotch. The low compact plants were in full bloom from May until November and the plants never were long or floppy. All who saw them growing in the field were very much impressed. Lg. Pkt. 50c; ⅛ Oz. \$1.65; ¼ Oz. \$2.75.			

Harris Grown GIANT PETUNIAS

Harris' Paramount Giant Petunias

Giant Waved Petunias Ideal For Plant Sales

W3809—ROYALTY (Harris Grown). Here is a new Petunia that will make more customers for you. A bed or border of these beautiful big velvety flowers in their varying combinations of deep blue and white will attract everyone's attention. In 3-in. pots, grown cool, they are a "sell-out." **Lg. Pkt.** (1000 seeds) 40c; $\frac{1}{64}$ Oz. 75c; $\frac{1}{32}$ Oz. \$1.00; $\frac{1}{16}$ Oz. \$1.50; $\frac{1}{8}$ Oz. \$2.50.

W3814—GIANT SNOWSTORM (Harris Grown). Very large, waved, pure white flowers on low growing plants. A constant bloomer in the garden and a good seller as potted plants. **Lg. Pkt.** (1000 seeds) 50c; $\frac{1}{64}$ Oz. \$1.75; $\frac{1}{32}$ Oz. \$2.75; $\frac{1}{16}$ Oz. \$4.50.

W3816—HARRIS' PURPLE PRINCE (Harris Grown). Not to be confused with any other "Purple Prince" offered. This is distinctly different. The largest flowered, deep, velvety violet-blue. Large open throats and waved petals. Very free flowering. **Lg. Pkt.** 35c; $\frac{1}{32}$ Oz. 75c; $\frac{1}{16}$ Oz. \$1.00; $\frac{1}{8}$ Oz. \$1.50.

W3817—THE ART (Harris Grown). Also called "Columbia." An exceptionally free-flowering fringed Petunia in unusual color combinations of bright reds and white, mostly in blotches. Very effective for potted plant sales. **Lg. Pkt.** (1000 seeds) 50c; $\frac{1}{64}$ Oz. \$1.00; $\frac{1}{32}$ Oz. \$1.75; $\frac{1}{16}$ Oz. \$3.00.

Giant Ruffled Petunias

A Harris Specialty and A Florists' Favorite

W3802—PARAMOUNT GIANTS, Mixed Colors (Harris Grown). An extra fine strain of our own growing especially selected for florists' use. The immense deep-throated well ruffled flowers are on low-growing compact plants that do not run up tall during the summer. They start flowering when the plants are very small, making them exceptionally good for spring sales. The colors are selected for brightness and include a large percentage of red and white blotched. **500 seeds** 65c; **1000 seeds** \$1.00; $\frac{1}{64}$ Oz. \$2.25; $\frac{1}{32}$ Oz. \$3.75; $\frac{1}{16}$ Oz. \$6.75; $\frac{1}{8}$ Oz. \$10.00.

W3808—RUFFLED SALMON BEAUTY (Harris Grown). A giant bright salmon-pink. Immense well ruffled flowers with golden throat. An excellent florist's variety. Very similar to the new "Glamour." **Lg. Pkt.** (1000 seeds) 70c; $\frac{1}{64}$ Oz. \$1.50; $\frac{1}{32}$ Oz. \$2.50; $\frac{1}{16}$ Oz. \$4.00.

W3813—THEODOSIA (Harris Grown). We know we have the best strain of this popular bright pink with golden center. Large and well fringed. **Lg. Pkt.** (1000 seeds) 50c; $\frac{1}{64}$ Oz. \$1.00; $\frac{1}{32}$ Oz. \$1.75; $\frac{1}{16}$ Oz. \$3.00.

W3811—HARRIS' QUAKER LADY (Harris Grown). A very desirable giant-flowered variety similar to "German Empress." The bluish-white with purple veining is always in demand on every market. **Lg. Pkt.** (1000 seeds) 50c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00.

Other Good Petunias

Especially for Plant Growers

W3807—DAINTY LADY. Dwarf plants with fringed creamy yellow flowers in abundance. **Lg. Pkt.** (1000 seeds) 50c; $\frac{1}{64}$ Oz. \$1.25; $\frac{1}{32}$ Oz. \$2.00.

W3812—MARTHA WASHINGTON. A very dwarf compact plant covered with fringed blush-pink flowers veined wine-red. Very late flowering in some Northern sections. **Lg. Pkt.** 35c; $\frac{1}{32}$ Oz. 90c; $\frac{1}{16}$ Oz. \$1.50.

VICTORIOUS ALL-DOUBLE PETUNIAS

	500 seeds	1000 seeds
W3790—Mixed Colors		
W3797—Madonna, White		
W3794—Amaranth Red	\$1.50	\$2.50
W3793—Carmine King (World Beauty or Pink Perfection)		

"Your Petunia seed was very good. I have been buying your seed for over 40 years." S. J. Cook, Dunkirk, N. Y.

"Just a line to tell you I raised and sold 6500 Paramount Giant Petunia plants this year. My customers think they are wonderful. I hope you have more next year." L. H. Leide, E. Stroudsburg, Penna.

Harris Grown BEDDING PETUNIAS

Single Low-growing BEDDING PETUNIAS All Harris Grown

This is the most popular class of Petunias for outdoor bedding and are the leaders for plant sales in pots and flats.

Petunias being one of our specialties, we make every possible effort to offer only the best strains of the most desirable colors, testing them carefully for growth and color.

In order to assure you of better and more dependable Petunias we increased our seed-growing acreage to include the very important four leading colors of low-growing single Petunias. This makes it possible for you to sell plants with full confidence you will be making pleased customers.

W3826—CELESTIAL ROSE. The finest all-purpose bright pink. A more attractive shade and more compact growing than Rose of Heaven. A clear pink without the large white throat of Rosy Morn. This is the most compact and uniform growing strain. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 55c; $\frac{1}{4}$ Oz. 85c; Oz. \$2.50.

W3827—HEAVENLY BLUE Improved. This is the light blue so much in demand for plants but generally very variable in color. We are finally able to produce a much improved strain. In the field, the color was 100% true clear, light-blue and the plants uniformly low and compact. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 65c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

W3825—DARK PURPLE. A very much improved stock, more compact growing and a deep velvety dark blue-purple. As low growing as Celestial Rose. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3821—SNOWBALL. A new white, more uniform in growth and of the same compact habit as Celestial Rose. Most white Petunias offered are much taller. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3823—ROSY MORN. An unusually good strain of the ever-popular white-throated pink for bedding, boxes, etc. The flowers were larger and the plants remained uniformly low growing even during the extremely hot weather. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3829—ELEANOR BLUE (Harris Grown). It has taken us four years to get this desirable mid-blue back into production. The color is a pleasing shade of deep lilac, different from the other mid-blues, and more desirable. The plants are semi-dwarf, but unusually uniform in height and color. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

W3842—FIRST LADY (Harris Grown). A new very beautiful clear salmon-pink on dwarf upright growing plants. Also called "Fair Lady." The most pleasing shade of pink ever seen in any Petunia, and sure to become the most popular. Seed still very scarce. Lg. Pkt. 40c; $\frac{1}{16}$ Oz. \$1.00; $\frac{1}{8}$ Oz. \$1.75; $\frac{1}{4}$ Oz. \$3.00.

W3844—CREAM STAR. We consider this the best white bedding Petunia ever introduced. The plants are uniformly compact and do not get "leggy." All summer they are a perfect mound of large creamy-white flowers. All of your customers will repeat on this one. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 55c; $\frac{1}{4}$ Oz. 85c; Oz. \$2.80.

W3836—HARRIS' BLACK PRINCE. An improved strain of our own growing. A dwarf "Flaming Velvet" similar to "Velvet Ball." The color is the darkest red it is possible to imagine, while the plants are uniformly compact growing. We found it to be one of the best selling Petunias in the spring plant trade. Lg. Pkt. 40c; $\frac{1}{8}$ Oz. \$1.00; $\frac{1}{4}$ Oz. \$1.75; Oz. \$6.00.

W3843—GLOW (Harris Grown). Low growing, large flowered, and the brightest light scarlet of all Petunias. This strain of our own growing is the most uniform we have ever seen. Lg. Pkt. 40c; $\frac{1}{16}$ Oz. \$1.00; $\frac{1}{8}$ Oz. \$1.75; $\frac{1}{4}$ Oz. \$3.00.

A Better Mixture

W3840—HARRIS' SPECIAL FOUR-COLOR MIXTURE. Here is an unusually fine mixture especially made up for particular buyers. We make this mixture from the same fresh, new-crop seed described above, using carefully balanced proportions of Celestial Rose Snowball, Dark Purple and Heavenly Blue. Lg. Pkt. 20c; $\frac{1}{8}$ Oz. 35c; $\frac{1}{4}$ Oz. 60c; Oz. \$2.00.

Two New Harris Petunias

All-America Winners for 1943

W3851—IGLOO. A new very low-growing, compact pure white of unusual uniformity. The plants are perfect mounds of white that remain in perfect form for a long season. A perfect variety for spring plant sales. Pkt. 25c; Lg. Pkt. 50c.

W3847—ENGLISH VIOLET. A most pleasing shade of mid-blue. Very free-blooming and uniform in habit and color. Pkt. 25c; Lg. Pkt. 50c.

W3824—TOPAZ ROSE. The deepest pink Bedding Petunia with a golden throat. Taller than the other "Low-Growing Bedding Petunias." A very showy and pleasing color and free bloomer. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 45c; $\frac{1}{4}$ Oz. 75c.

W3822—SALMON SUPREME. The new true salmon bedding Petunia. Gold Medal All-America winner for 1938. Very low and compact and a pleasing shade. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 80c; $\frac{1}{4}$ Oz. \$2.00.

W3846—RADIANCE. The new 1940 All-America winner. Brightest cherry-red with golden throat. Very vigorous and free-flowering. Taller than the others. Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 65c; $\frac{1}{4}$ Oz. \$1.00; Oz. \$3.50.

CELESTIAL ROSE growing in the field a long distance from any other kind to prevent crossing with other colors.

SNAPDRAGONS

Harris'-Grown Colossal Tall Snapdragons

W5030—Mixed Colors. It has taken us several years to develop a strain of giant-flowered Snapdragons we felt sure would be more satisfactory in the North. The flowers are larger and they bloom more freely.
Lg. Pkt. 20c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 85c; Oz. \$2.80.

Harris-Grown Separate Colors

Flowers larger, spikes longer and more full; plants earlier and more vigorous.

W5032—Colossal Pink Shades.....	Pkt. $\frac{1}{8}$ Oz. $\frac{1}{4}$ Oz.
W5034—Colossal Yellow.....	\$.30 \$.60 \$1.00
W5035—Colossal Crimson.....	
W5036—Colossal Orange Shades.....	

Tall Giant Flowered Snapdragons (Rust-Resistant)

These are the finest Tall Snapdragons we can buy. They are American grown, and fresh seed of high germination. The flowers are large and well placed on stems growing 2 to 2½ feet high. For plant trade, the seed is usually started in early February.

W5051—Pure White.....	Lg.
W5052—Autumn Glow. Beautiful terra-cotta pink.....	Pkt. $\frac{1}{8}$ Oz. $\frac{1}{4}$ Oz. Oz.
W5053—Bright Rose.....	
W5054—Wallflower Red. Brown and red combinations.....	\$.25 \$.55 \$.95 \$3.00
W5055—Crimson. Deep red with dark foliage.....	
W5056—Orange.....	
W5057—Canary Yellow.....	

W5050—VARIETY MIXTURE. Our own special mixture, using proper amounts of the seven colors. An exceptional mixture for plant trade.
Lg. Pkt. 15c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 75c; Oz. \$2.50.

SALVIA

W4600—HARRIS' BONFIRE. With the florist, the name of Harris has become synonymous with superior quality and high germinating Salvia seed. Our own special strain of Bonfire Salvia which we recently introduced has met with increasing popularity. The spikes are larger, longer, and the florets placed more closely together. The growth is as uniform as though it had been sheared. The color is of a brighter shade than any other variety, and the germination higher. Lg. Pkt. 25c $\frac{1}{4}$ Oz. 90c; Oz. \$3.00; $\frac{1}{4}$ Lb. \$10.00.

W4603—DWARF FIREBRAND. A new and improved strain of very early-flowering, low-growing Salvia of our own growing here in the North. The plants are about 18-inches tall and surmounted with masses of brilliant scarlet spikes from early summer until frost, remaining the same height all through the season. This is an exceptionally fine new strain your customers will like.
Lg. Pkt. 35c; $\frac{1}{8}$ Oz. 75c; $\frac{1}{4}$ Oz. \$1.25; Oz. \$4.50.

W4603—FARINACEA. Blue Bedder. Ideal for cutting. Long-stemmed graceful sprays of an attractive shade of light-blue. The 2-ft. tall plants are grown in the same way as Bonfire Salvia and continue to bloom until almost snow-time. Seed of our own growing.
Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 85c; Oz. \$3.00.

Harris' Half-Tall Snapdragons

Half-Tall Snapdragons (Harris Grown)

W5107—ST. GEORGE. A very free-flowering brilliant orange-cerise of compact growth. Large flowers on heavy spikes. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 75c.

W5108—ROYAL ROSE. The richest and brightest rose imaginable. Free-flowering on compact plants. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 75c.

W5109—GUINEA GOLD. A beautiful combination of gold and apricot. Larger flowers on compact spikes. Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 75c.

W5115—NEW-COLOR MIXTURE. Here is something special in a mixture of Half-Tall (18-24 inches) Snapdragons. It is a mixture we make by using the light and unusual colors. Might be called a "Pastel Mixture." Good for plant trade.
Lg. Pkt. 20c; $\frac{1}{4}$ Oz. 60c; Oz. \$1.80.

STOCKS

Harris' "Sure-To-Bloom" Stocks

A new strain of the "10-Weeks" type. In our tests they have never failed to bloom 100% from seed sown out-doors in May.

The plants start flowering while very small and continue to grow and bloom all summer and autumn. The final height is 15 to 18 inches.

W6024—Azure Blue.....	Lg.
W6023—Blood Red.....	Pkt. $\frac{1}{8}$ Oz. Oz.
W6026—Canary Yellow.....	
W6025—Dark Blue.....	\$.30 \$.70 \$2.10
W6021—White.....	
W6022—Flesh Pink.....	
W6027—Rose.....	
W6020—VARIETY MIXTURE.....	.20 .60 1.80

New Giant Imperial Stocks

W6000—VARIETY MIXTURE. A special mixture we make by using equal amounts of the following six separate colors: White, Yellow, Rose, Azure, Dark Blue, Blood Red. These are the finest giant-flowered double branching, tall growing Stocks obtainable.
Lg. Pkt. 25c; $\frac{1}{8}$ Oz. 40c; $\frac{1}{4}$ Oz. 70c; Oz. \$2.50.

SEPARATE COLORS.—We can supply any of the above named six separate colors for $\frac{1}{8}$ Oz. 50c; $\frac{1}{4}$ Oz. 90c; Oz. \$3.00.

SWEET PEAS

ZINNIAS

Each year we try nearly all of the different kinds and colors of Zinnias in order to be sure to offer you only those we find to be the best.

For out-door cut flowers we urge you to use our Giant "Two-Tone" Zinnias, the color range is ideal. Fantasy Zinnias are also increasing in popularity for cutting.

The most extensive use for Zinnias is in growing plants in "flats," for spring sales. Sow seed in early April. The Giant Flowered are the most popular and there is an increasing demand for separate colors. Pompon Zinnias are next in popularity.

A New Giant Zinnia Mixture

W8160—Giant "Two Tone" Zinnias, Light-Color Mixture. A new race of giant flowers in unusually beautiful color combinations of the pastel shades. Be sure to sow some of these new Zinnias for your plant trade.
Lg. Pkt. 15c; ¼ Oz. 50c; Oz. \$1.40;
¼ Lb. \$4.00.

Giant Flowered Zinnias

W8149—Illumination, Bright pink...	Lg.		
W8154—Canary Bird, Canary yellow	Pkt. ¼ Oz.	Oz.	
W8155—Crimson Monarch, Dark...			
W8147—Cherry Queen, Rose scar-			
let, The brightest of all...

NEW DWARF SWEET WILLIAM

W6140—Mixed Colors. Our own growing of this new type so much in demand by plant growers. Sowed outdoors in the summer it makes ideal clumps 6 to 8 inches tall for early spring plant sales. Lg. Pkt. 25c; ¼ Oz. 65c; Oz. \$2.00.

SULROTE Harris' Favorite Double-Duty Dusting Mixture a Combined Insecticide and Fungicide

An ideal Rotenone-Sulphur dusting mixture containing 0.80% Rotenone. Better than Rotenone 75% as a killing agent and in addition, contains Air-Floated Dusting Sulphur making it an effective fungicide. These are blended together with an improved wetting agent which makes it better adhere to the leaves.

We Use **SULROTE** extensively on our own farms and can enthusiastically recommend it for combatting bean beetles, cabbage worms, aphids, flea beetles, rose chafers, cucumber beetles, etc.; as well as mildew and any other fungi controlled by sulphur. Descriptive folder on request. Used as a dust on beans, 15 to 20 lbs. per acre; on most other crops, 20 to 30 lbs. per acre.

PRICES: 1 lb. bags 50c postpaid; 5 lb. bags \$1.40 not prepaid; case of 60 lbs. \$11.00 not prepaid. Write for prices on larger quantities.

Sprays We Recommend For Combatting Insects

PYROTE. An unexcelled combination of pyrethrum and rotenone for killing most all kinds of insects on both flowers and vegetables. No spreader needed, non-injurious to foliage, easy to mix, no objectionable odor, and economical.

5 Oz. (makes 15 to 30 gal. solution) \$1.00 postpaid
1 pint (makes 50 to 100 gal. solution) 2.85 postpaid
1 gallon \$10.65 By express Not prepaid

EVERGREEN. One of the most effective sprays for killing both chewing and sucking insects. Contains a soap spreader.

6 Oz. (makes 18 to 36 gal. solution) \$1.00 postpaid
1 pint (makes 50 to 100 gal. solution) 2.15 postpaid
1 gallon \$12.20 By express Not prepaid

BLACK LEAF "40." Standard nicotine-sulphate insecticide used as a contact spray for aphids, leafhoppers, delousing poultry, etc. Economical.

5 Oz. (makes 10 to 40 gal. solution) \$1.10 postpaid
1 lb. (makes 30 to 120 gal. solution) 2.60 postpaid
2 lbs. \$3.70; 5 lbs. \$6.90 By express Not prepaid

HYDROXIDE. A double-duty spray for killing bugs and controlling blight on potatoes and tomatoes.

4 lbs. (makes 40 gal. solution) \$1.25 postpaid

CALCIUM ARSENATE. Can be used as a spray on all ground crops in place of Arsenate of Lead, now so scarce. Also effective as a quick action dust.

4 lb. bag (makes 50 gal. of spray) \$.80 postpaid

ARSENATE OF LEAD. Supply very limited. Use with Hydrated Lime as spray or dust.

4 lb. bag (makes 100 to 150 gal. of spray) \$1.20 postpaid

Write for special prices on larger quantities of any of the above spray material.

For Treating Seed

SEMESAN. See page 27 of this catalogue.

If we are out of any of the varieties ordered, shall we substitute others equally good? Ans.
or shall we return the money sent for them? Ans.

Use HOTKAPS and HOTENTS To Get Earlier Crops and Highest Prices

We have tried a number of other plant protectors side by side with Hotkaps and Hotents in our melon fields but have found none which are more convenient to use or have equal ability to stand high winds and beating rains.

HOTKAPS are scientifically constructed wax paper cones, which are placed over the plant or hill of seeds. Their use enables the grower to set out his plants or plant his seed as soon as the ground is warm. They afford protection to the young plants from frost, wind and beating rains and insects.

PRICES. Please give us your shipping instructions.

250 with Fibreboard Setter (wt. 9 lbs.)	\$ 3.50	not prepaid
500 without setter (wt. 15 lbs.)	6.50	not prepaid

9 x 12 in.	1.60 ea.	1.55 ea. (wt. 8 lbs. ea.)

Use "Fertile" Pots for better, earlier crops!

Seedlings set in these pots can be grown and then set in the field, pot and all without checking the plant, even in very dry weather. These pots are made with just the right amount of fertilizer for the best plant growth.

Large growers find these pots not only save time and labor but actually produce earlier fruit and better yields. Especially valuable for Early Cabbage, Eggplant, Peppers, Tomatoes, Melons, Squash, etc.

PRICE: Fertile Pots are packed in cartons as follows:

Not Prepaid	
No. 2 (about 2" dia.) per carton of 500 \$4.75
No. 2½ (about 2½" dia.) per carton of 500 5.25
No. 3 (about 3" dia.) per carton of 335 4.00

For prices of small quantities see our General Catalogue.
